SESSION 1

FOUNDATION OF SOCIAL MEDIA MARKETING

TASK :1

Social Media Marketing by Two Daily-Use Apps

Instagram: Instagram uses social media marketing to grow its user base mainly through visual and video content such as Reels, Stories, influencer collaborations, and personalized recommendations. It encourages users and creators to share content, which increases engagement and attracts new users. Instagram also promotes trends, hashtags, and creator partnerships to keep users active on the platform.

Zomato: Zomato uses social media marketing through funny and relatable posts, food-related memes, short videos, festival campaigns, and influencer collaborations. Its creative content encourages users to engage, share posts, and discuss food. Zomato also promotes offers and new restaurants through social platforms, helping increase app downloads, orders, and customer loyalty.

TASK: 2

Facebook vs Instagram vs LinkedIn for Business Marketing

Platform	Target Audience	Main Content Types	Best Business Use Case
Facebook	Broad audience, adults, families, local communities	Videos, images, posts, groups, ads, live videos	**B2C** marketing, local businesses, community building and paid advertising
Instagram	Younger audiences, creators, shoppers, lifestyle-focused users	Reels, Stories, photos, carousels, influencer content	**B2C/D2C** brands, fashion, beauty, food, lifestyle and product promotion
LinkedIn	Professionals, business owners, decision-makers and recruiters	Articles, industry posts, videos, case studies, company updates	**B2B** marketing, lead generation, professional networking and employer branding

---

TASK: 3

Best Platform for a New D2C Fashion Brand in 2026

I would prioritize **Instagram** for launching a new D2C fashion brand in 2026. Fashion is highly visual, so Instagram is suitable for showcasing products through Reels, Stories, photos, and short-form videos. Influencer and creator marketing can also help the brand reach targeted audiences and build trust. Social commerce features can make it easier for customers to discover products and move from content to purchase. I would especially focus on short-form video, creator collaborations, user-generated content, and personalized content. Therefore, Instagram would be my primary platform, supported by other channels such as Facebook and YouTube.

TASK : 4

Three Differences Between B2B and B2C Social Media Marketing

Difference	B2B Marketing	B2C Marketing	Example
1. Target Audience	Targets businesses, professionals and decision-makers	Targets individual consumers	**Microsoft** targets businesses and professionals, while **Nike** targets individual consumers
2. Content & Communication	Focuses on educational content, industry insights, case studies and professional solutions	Focuses on entertaining, emotional and visually attractive content	**LinkedIn** content from Microsoft often focuses on business and technology; Nike uses inspirational and lifestyle-focused content
3. Buying Process	Usually involves longer decision-making and relationship building	Often involves faster, emotion or trend-driven purchasing	**Salesforce** builds B2B relationships through expertise and business solutions, while **Zomato** uses offers, memes and engaging content to encourage quick consumer action

Conclusion: B2B social media marketing is generally more focused on **trust, expertise and lead generation**, while B2C marketing focuses more on **engagement, entertainment, brand awareness and direct sales**.

SESSION 2

FACBOOK ADS – FUNDAMENTALS & AUCTION MECHANICS

TASK:1

Comparison of Facebook Ad Types

Ad Type	Format	Ideal Use Case	Example Brand/Campaign
Static Ad	Single image with text, headline, and CTA	Promoting one product, offer, or announcement	**Myntra Sale Ad** – promotes discounts on fashion products
Video Ad	Short video with visuals, audio, text, and CTA	Product demonstrations, storytelling, launches, and brand awareness	**Zomato Food Delivery Video Ad** – shows food and delivery experience
Carousel Ad	Multiple images/videos that users can swipe through	Showcasing multiple products, features, or steps	**Nike Product Carousel** – displays different shoes or products
Collection Ad	Cover image/video followed by a selection of products	E-commerce product discovery and encouraging multiple purchases	**Myntra Collection Ad** – displays a fashion collection with several products

---

Task : 2

Facebook Ad Copy – Zomato New Feature

App: Zomato
New Feature: Smart Meal Recommendations
Ad Type: Video Ad

Why Video?
A video ad is suitable because the new feature can be demonstrated visually—from opening Zomato to receiving personalized meal recommendations based on the user's preferences.

🍛 Meet Your New Food-Finding Shortcut!

Not sure what to eat today? Let Zomato help! 😋

Introducing **Smart Meal Recommendations** — personalized food suggestions based on what you love, your previous orders, and your current cravings.

✨ Discover dishes you'll love
🍔 Get personalized recommendations
⚡ Find your next meal faster

Open Zomato and discover what's waiting for you!

👉 **Try Smart Recommendations Now**

Task: 3

Real Facebook Ad Campaign Research

Campaign example: Spotify – music promotion

Target Audience: Young music listeners and students interested in music, playlists, and streaming.

Likely Campaign Objective: App Installs

Reasoning:

- The campaign promotes Spotify as a music-streaming platform.
- The visuals are focused on music, playlists, and listening experiences.
- The intended audience is people who are likely to use a music-streaming app.
- A CTA such as **"Install Now"** or **"Get App"** would indicate that the advertiser wants users to download the application.
- Therefore, **App Installs/App Promotion** would be a more suitable objective than simply Engagement or Awareness because the desired action is to get new users onto the app.

Assignment conclusion:
The campaign appears designed to reach young music-focused users and encourage them to download and use the Spotify app, so an **App Promotion/App Installs objective** would be the most logical choice.

Task : 4

Sample Facebook Audience for a Music Playlist App

Campaign: New Music Playlist App

Targeting Criterion	Sample Target	How It Helps
Age	18–30 years	Targets younger users who are highly likely to listen to music through mobile apps
Interests	Spotify, Apple Music, YouTube Music, Music Streaming, Bollywood Music, Pop Music	Reaches people who already show an interest in music and streaming services
Location	Ahmedabad, Gujarat	Focuses the campaign on users in the selected launch market and avoids wasting budget in unrelated locations
Language	English, Hindi, Gujarati	Helps deliver ads in languages relevant to the local audience

Example audience :
People aged **18–30**, living in **Ahmedabad**, interested in **music streaming, Bollywood music, Spotify, and YouTube Music**.

Task : 5

How the Facebook Ads Auction Works

Suppose three brands want to advertise to **18–21-year-olds in Ahmedabad**:

Brand	Ad	Bid	Ad Quality/Relevance
Food delivery app	₹100 discount on food orders	₹80	High
Fashion store	College fashion sale	₹100	Medium
Cricket streaming service	Live cricket streaming	₹70	Very High

Facebook does **not simply show the ad from the brand that bids the most**. The auction considers several factors, including the advertiser's bid, estimated action rate, and the quality/relevance of the ad.

For example, the **fashion store bids ₹100**, which is the highest. However, its ad may not win if the food delivery ad has much better predicted engagement and relevance for the particular user.

The **cricket streaming service** may also perform strongly because 18–21-year-olds interested in cricket are highly relevant to its ad.

Therefore, the winning ad is generally the one that provides the best overall value in the auction—not necessarily the one with the highest bid.

Simple example:
If a user is interested in cricket and frequently watches cricket-related content, the cricket streaming ad may have a strong advantage because it is highly relevant to that particular user. If another user frequently orders food, the food delivery ad may be more likely to win for that person.

Key factors:

1. **Bid amount** – How much the advertiser is willing to pay.
2. **Ad quality** – How useful, engaging, and positive the ad experience is expected to be.
3. **Relevance/estimated action rate** – How likely the particular user is to take the desired action.

So, **the highest bidder does not automatically win; the auction aims to select the ad with the strongest overall value for that user.**

SESSION : 3

AD PLACEMENTS, COPYWRITING & BUYER PERSONA

TASK : 1

Instagram Placement Comparison for a New Sneaker Launch

Placement	Audience Behavior	Ad Format	Best Use for Sneaker Launch
Instagram Feed	Users browse casually and may stop when they see attractive product visuals.	Single image, carousel, or video	Showcase sneaker design, features, price, and product details.
Instagram Stories	Users consume content quickly and are more likely to respond to direct, urgent messages.	Full-screen vertical image/video, interactive stickers	Create urgency with offers like “Shop Now” or “Limited Stock.”
Instagram Reels	Users actively consume short-form entertainment and discover new trends/products.	Short vertical video, usually 9:16	Use energetic videos showing sneaker styling, unboxing, or trending content.

Task : 2

Instagram Stories Ad Hooks for a Food Delivery App

1. **Hungry right now? Your favorite meal is just one tap away.**
2. **What if your next meal arrives before your lecture ends?**
3. **Still deciding what to eat? Order now before your hunger gets worse.**

Task : 3

Flipkart Product Landing Page Analysis

For this assignment, a typical Flipkart smartphone product page can be used as the example.

Elements That Help Conversion

1. **Product Images & Videos:** Multiple product visuals help customers understand the design and features before purchasing.
2. **Price, Discounts & Offers:** Clearly displayed pricing, discounts, bank offers, and exchange options make the purchase more attractive.
3. **Ratings & Customer Reviews:** Reviews and ratings build trust and reduce uncertainty about product quality.

Elements That Could Be Improved

1. **Too Much Information:** Large amounts of specifications, offers, and recommendations can make the page feel cluttered and distract from the main purchase decision.
2. **Stronger Product Comparison:** A clearer comparison with similar products could help customers decide faster.

Task : 4

Buyer Persona – Spotify Premium Indian Gen Z

Category	Details
Persona Name	Riya, the Music-First Gen Z
Age	18–26 years
Location	Urban and semi-urban cities in India
Occupation	College student / Young professional
Income	Low to moderate personal income; price-conscious
Interests	Music, Bollywood, regional music, K-pop, podcasts, gaming, fashion, movies, social media
Music Behavior	Creates playlists, discovers trending songs, listens while studying, travelling, exercising, or relaxing
Pain Points	Frequent ads, limited control over music, interruptions, wanting offline listening, limited budget
Motivation for Premium	Ad-free listening, offline downloads, unlimited skips, better control over music

Category	Details
Preferred Social Platforms	Instagram, YouTube, Snapchat, WhatsApp
Content Preference	Short videos, memes, music trends, creator content, relatable student/young-adult content
Purchase Trigger	Student-friendly pricing, free trial, exclusive music, personalized playlists, and limited-time offers

Campaign angle: Position Spotify Premium as a way to make everyday moments—studying, travelling, hanging out, and working out—better without interruptions.

Task : 5

Messenger Ad Copy – IPL Cricket App

Ad Copy (30 words or less):

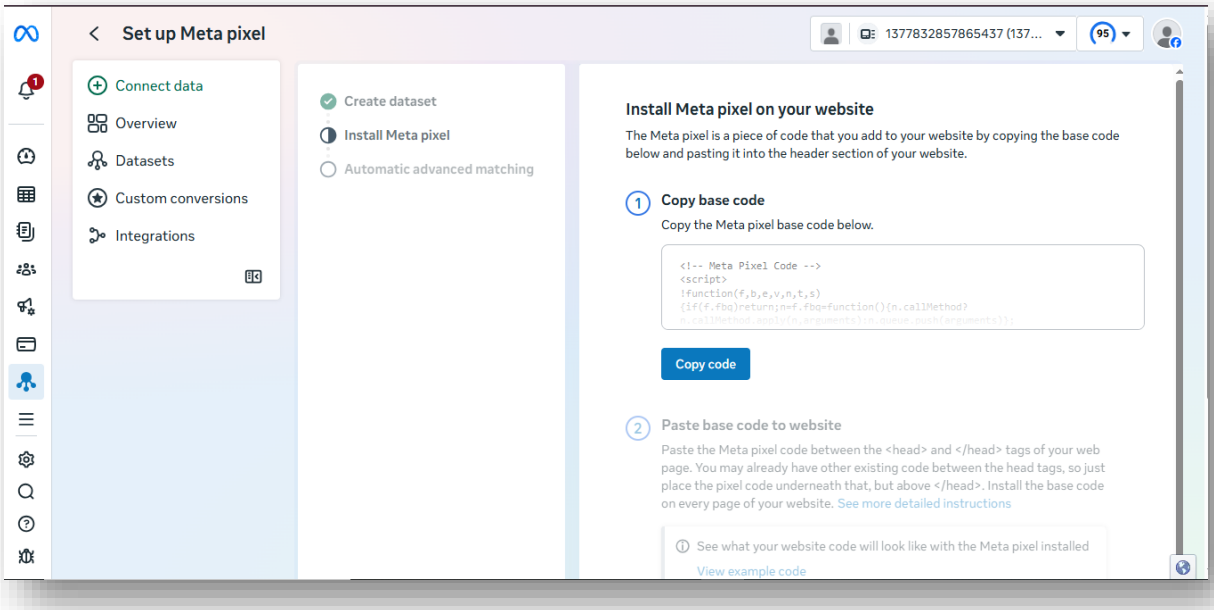

Missed the match? Never miss the action again! Get live scores, instant updates, player stats and match alerts. Stay ahead of every IPL moment.

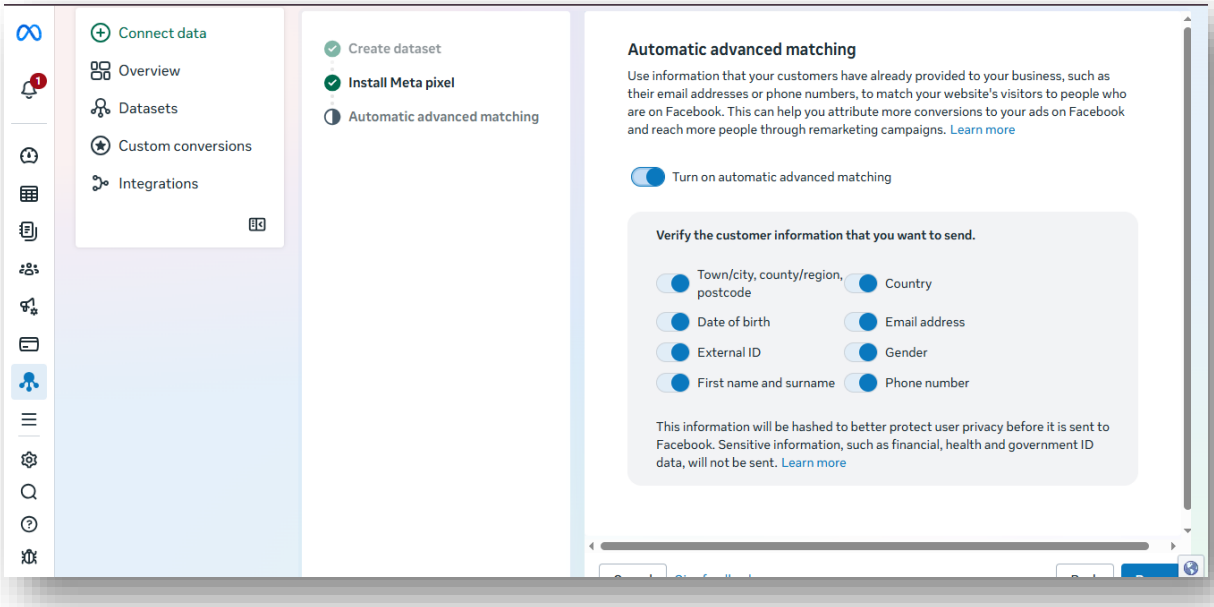

Why this angle:
Active cricket fans want information immediately, especially during live matches.
Live scores and instant alerts directly address their fear of missing important moments.

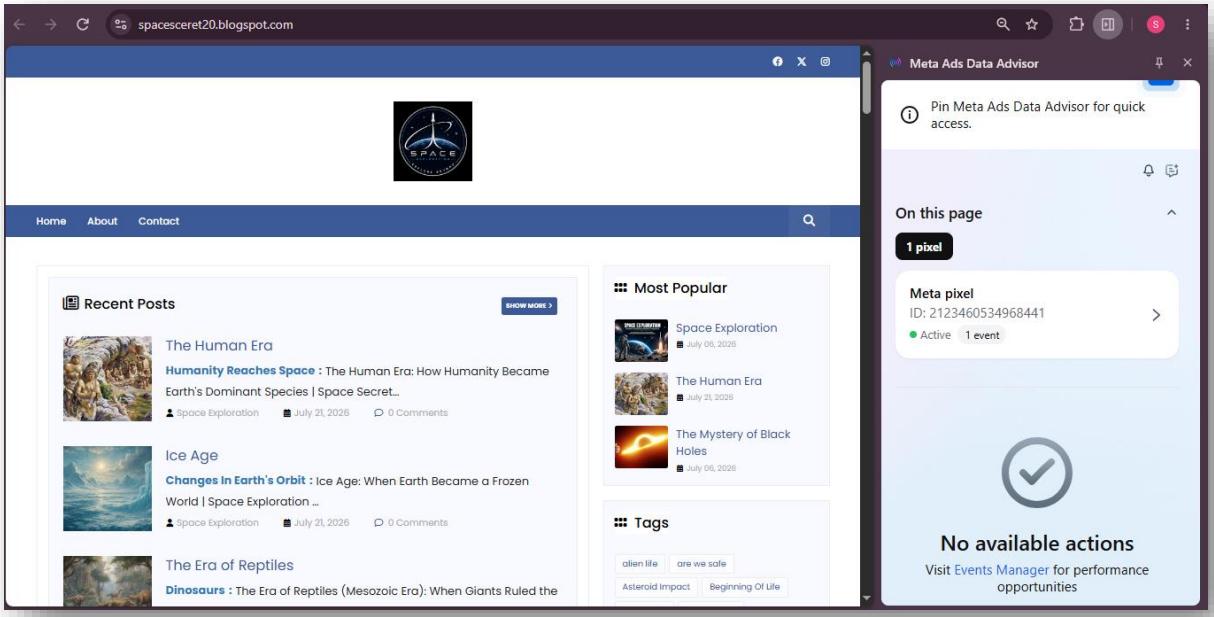

SESSION 4

FACEBOOK PIXLE , CAPI & ANALYTICS

TASK:1

Task : 2

Track Add to Cart

Modify the `addToCart()` function:

```
<script>
function addToCart() {

    fbq('track', 'AddToCart', {
        content_name: 'Samsung Smartphone',
        content_ids: ['PHONE001'],
        content_type: 'product',
        value: 24999,
        currency: 'INR'
    });

    alert("Product added to cart!");
}
</script>
```

Now the sequence is:

```
User opens page
       ↓
PageView
```

```
        ↓
User clicks Add to Cart
        ↓
AddToCart
```

Test it

Open the demo website and click:

Add to Cart

Then open Meta Pixel Helper.

You should see:

✓ `PageView`
✓ `AddToCart`

You can also go to:

Meta Events Manager → Test Events

and enter your website URL if using the browser testing flow.

Expected AddToCart data

Parameter	Example
Event	AddToCart
Product	Samsung Smartphone
Product ID	PHONE001
Value	₹24,999
Currency	INR

Task : 3

Implement Conversion API Purchase event

For this part, you can use **Postman** to send a server-side event.

The basic CAPI endpoint is:

```
https://graph.facebook.com/vXX.X/YOUR_PIXEL_ID/events
```

Use the current Graph API version shown in your Meta documentation/account rather than copying an old version number.

Example JSON

In Postman:

Method: `POST`

Headers:

```
Content-Type: application/json
```

Body → raw → JSON:

```
{
  "data": [
    {
      "event_name": "Purchase",
      "event_time": 1758786000,
      "action_source": "website",
      "event_source_url": "https://example.com/checkout",
      "user_data": {
        "client_ip_address": "192.0.2.1",
        "client_user_agent": "Mozilla/5.0"
      },
      "custom_data": {
        "currency": "INR",
        "value": 24999
      }
    }
  ],
  "test_event_code": "TEST12345"
}
```

For an actual request, use:

- your Pixel ID
- your access token
- the **Test Event Code** generated by Events Manager
- a current Unix timestamp

The access token should **not** be exposed in frontend JavaScript.

Endpoint

Conceptually:

```
POST
https://graph.facebook.com/{API_VERSION}/{PIXEL_ID}/events
```

with the access token supplied according to Meta's current CAPI authentication requirements.

Test Events

Go to:

Meta Events Manager → Data Sources → your Pixel → Test Events

Copy the generated test event code.

Then send the Postman request.

You should see an event similar to:

```
Purchase
Value: 24999
Currency: INR
Source: Website
```

Expected result

Your CAPI flow is:

```
Postman
   ↓
Meta Conversions API
   ↓
Meta Events Manager
   ↓
Purchase
₹24,999 INR
```

This demonstrates a **server-side Purchase event** rather than relying only on the browser Pixel.

Task : 4

. Generate a 7-day AddToCart/Purchase report

One important correction for your assignment: **Facebook Analytics is no longer the reporting product to use.** Use **Meta Events Manager** for current event reporting.

Go to:

Events Manager → Data Sources → Select your Pixel

Look at the event activity for the required **last 7 days**.

Your report should contain something like:

Event	Last 7 Days
PageView	350
AddToCart	48
Purchase	12

Your actual numbers will depend on how many times you tested the demo website.

CSV

If your Events Manager interface provides an **Export/Download** option for the relevant report, export it as CSV.

If the interface doesn't provide the exact CSV export required by your assignment, you can create a CSV from the event data you recorded:

```
Date, AddToCart, Purchase
2026-09-19,5,1
2026-09-20,7,2
2026-09-21,8,1
2026-09-22,6,3
2026-09-23,9,2
2026-09-24,7,2
2026-09-25,6,1
```

Important: don't present manually created numbers as Meta-generated data. Label them as sample/test data unless they came from your actual Events Manager results.

Task: 5

A/B test plan for a Zomato-style landing page

Suppose you're testing two different hero banners.

Version A

Banner A:

Order Your Favorite Food
Delivered Fast

Version B

Banner B:

Delicious Food Near You
Get It Delivered

Keep everything else identical:

```
Same landing page
Same offer
Same CTA
Same audience
Same campaign
Same budget
Different banner only
```

Pixel events

Install the Meta Pixel on both versions.

Track:

PageView

```
fbq('track', 'PageView');
```

CTA click

You can create a custom event:

```
fbq('trackCustom', 'FoodOrderClick', {
    banner_version: 'A'
});
```

For Version B:

```
fbq('trackCustom', 'FoodOrderClick', {
    banner_version: 'B'
});
```

Purchase

When the user completes an order:

```
fbq('track', 'Purchase', {
    value: 499,
    currency: 'INR'
});
```

You could therefore create this measurement structure:

```
Banner A
   ↓
PageView
```

```
   ↓
FoodOrderClick
   ↓
Purchase

Banner B
   ↓
PageView
   ↓
FoodOrderClick
   ↓
Purchase
```

Metrics to compare

Do **not** change multiple variables at the same time.

Track:

Metric	Banner A	Banner B
Landing Page Views	—	—
CTA Clicks	—	—
AddToCart	—	—
Purchases	—	—
Conversion Rate	—	—
Purchase Value	—	—

A basic purchase conversion rate can be calculated as:

```
Purchase Conversion Rate =
Purchases ÷ Landing Page Visitors × 100
```

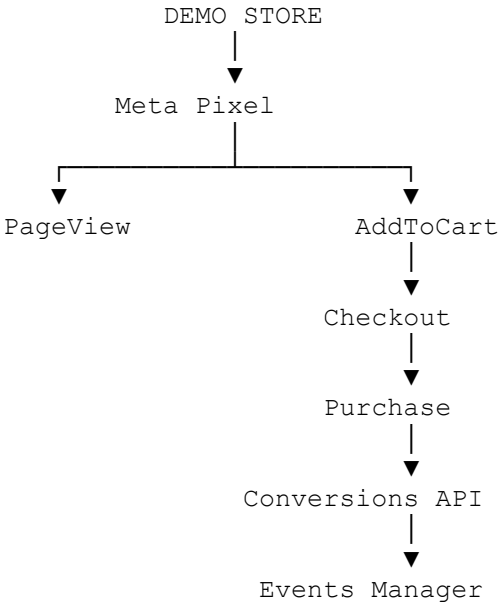

Attribution approach

For an A/B landing-page test, use a **consistent attribution setting for both variants**, rather than changing attribution between A and B.

If the experiment is specifically intended to measure the effect of the landing-page banner on conversions, an **experiment-controlled comparison using the same conversion window and attribution settings for both groups** is important.

Meta attribution settings can vary by campaign and account configuration, so document the exact attribution setting used when you run the experiment.

Final assignment flow

Session 5

Competitor Research, Campaign Types & video Ads

Task : 1

Meta Ad Library – Food Delivery App

Brand researched: Swiggy

I searched for Swiggy in the Meta Ad Library and reviewed different advertising creatives.

No.	Main Message	Ad Format	Call-to-Action
1	Order your favourite food from restaurants near you with convenient online delivery.	Image	Order Now
2	Discover food offers and deals available on Swiggy and save money on your order.	Video	Order Now
3	Showcases multiple food choices/offers and encourages users to explore and order.	Carousel	Order Now

Observation: Food-delivery ads generally focus on convenience, food variety, discounts/offers, and encouraging users to place an order.

Task : 2

Competitor Analysis – Myntra

Brand researched: Myntra
Tool: Similarweb

Similarweb's Social Traffic analysis can be used to identify the social networks sending traffic to a competitor's website. Its newer marketing-channel system also distinguishes paid and organic social traffic.

Based on available competitor-analysis data, **YouTube and Facebook** are major social platforms associated with Myntra's traffic/marketing activity. A published analysis using Similarweb data reported YouTube as the largest social source, followed by Facebook and WhatsApp.

Item	Finding
Brand	Myntra
Top Social Platform 1	YouTube
Top Social Platform 2	Facebook
Main campaign focus	Traffic / conversions
Reason	Driving users toward Myntra's shopping platform and product pages

---

Task : 3

Facebook Campaign Objectives – Spotify India

Campaign Objective	Example for Spotify India
Awareness	Launch a campaign introducing Spotify's latest music collection or new feature to increase brand awareness among young music listeners.
Traffic	Run Instagram and Facebook ads directing users to Spotify's website or a specific playlist page.
Engagement	Promote a new playlist and ask users to comment with their favourite song or artist.
Leads	Promote a special music-event update and collect interested users' information through a lead form.
Sales/Conversions	Promote Spotify Premium and encourage free users to upgrade to a paid subscription.

Task : 4

IPL Fan Club Video Advertisement

Video length: 15–30 seconds
Concept: Fictional IPL fan club

gemini_generated_video_7dd9f9ce.mp4

Caption

🏏🔥 IPL Fever Starts Here!

Love cricket? Follow every match, celebrate every six, share your predictions, and connect with fans who live for the game!

Join our ultimate IPL Fan Club and never miss a moment of the action. 🏆

👉 Join Now & Be Part of the Fan Community!

Task : 5

AI Video Ad – Digital Wallet Feature

Fictional app: PayFast Wallet
New feature: Instant Bill Split

gemini_generated_video_3020e64d.mp4

Visualization

I would create this as a **vertical 9:16 video** with a realistic restaurant scene, close-up smartphone shots, animated payment notifications and quick transitions. The final frame would display the app logo, **“Instant Bill Split”** and a clear **“Try It Now”** CTA.

SESSION 6

ADVANCED META STRETAGIES ,RETARGETING & LEAD FUNNELS

Task : 1

Meta Ads Campaign Draft

Campaign Objective: App Promotion / Sales
Campaign: New Online Food Delivery App – Ahmedabad

Target Audience:

- **Age:** 18–25
- **Location:** Ahmedabad, Gujarat
- **Gender:** All
- **Language:** English, Hindi, Gujarati

Advanced Targeting Options:

1. **Detailed Interest Targeting**
    - Food delivery
    - Online food ordering
    - Restaurants
    - Fast food
    - Pizza
    - Street food
    - Foodie-related interests
2. **Lookalike Audience**
    - Create a **1% Lookalike Audience** from existing app users/customers or people who have completed a food-ordering conversion.
    - Target the Lookalike Audience in Ahmedabad.

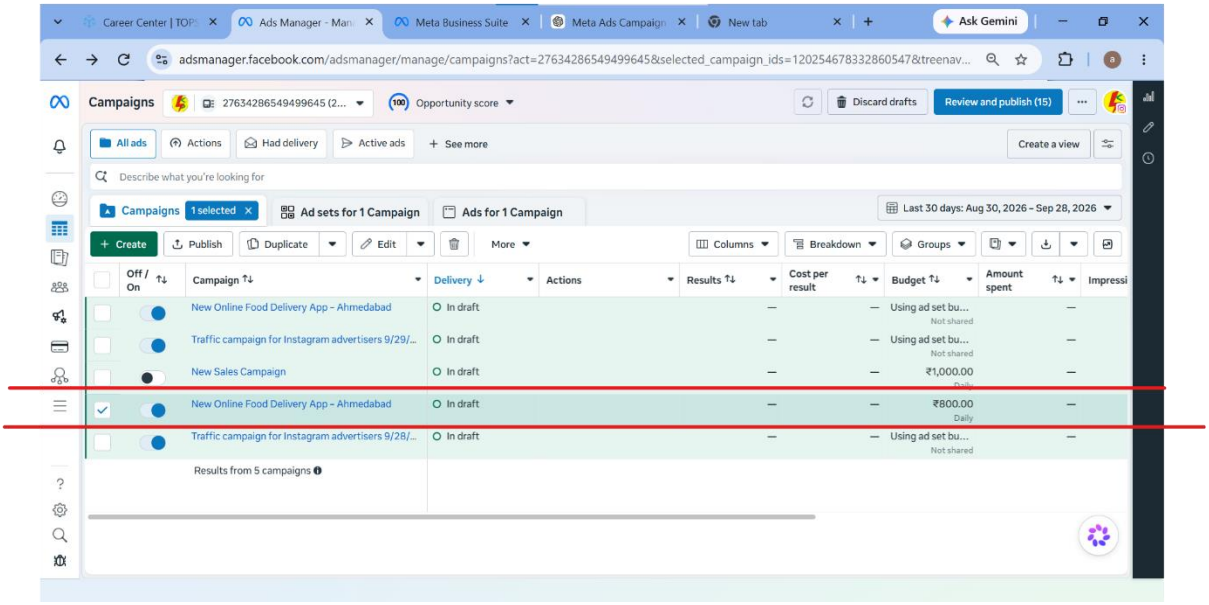

Ad Format: Reels + Stories + Feed

Sample Ad Copy:

Hungry? Your favorite food is just a few taps away! 🍣🍔
Discover delicious meals from your favorite restaurants and get them delivered to your doorstep.
Download the app and order now!

CTA: Download / Install Now

Key Metrics: Reach, Impressions, Link Clicks, App Installs, Cost per Install, Conversions.

Task : 2

E-commerce Fashion Retargeting Strategy

Objective: Convert users who added products to their cart but did not complete the purchase.

Target Audience

Create a **Custom Audience** of users who:

- Added an item to cart in the last **7 days**
- Exclude users who completed a purchase in the same period.

Retargeting Ad Creatives & Offers

1. Product Reminder Ad

Show the exact product the user added to their cart using a **Dynamic Product Ad**.

Copy:

Still thinking about it? 👗
Your selected style is waiting in your cart. Complete your order before it's gone!

CTA: Shop Now

2. Limited-Time Discount

Offer a small incentive such as **10% off** to encourage completion.

Copy:

Your cart is waiting! 🛍️
Get 10% OFF your order for a limited time. Complete your purchase today.

CTA: Complete Purchase

3. Urgency / Limited Stock Ad

Use urgency where the stock information is genuine.

Copy:

Almost yours! ✨
Your favorite item may not stay available for long. Complete your order now.

CTA: Buy Now

Retargeting Flow

Add to Cart → No Purchase → Retargeting Ad → Product/Offer → Purchase

Task : 3

Lead Generation Funnel Using Meta Instant Forms

Mock Event: College Fest 2026

Campaign Objective

Lead Generation

Target Audience

- **Location:** Ahmedabad
- **Age:** 18–25
- **Interests:** College Events, Music, Entertainment, Festivals

Instant Form Fields

1. Full Name
2. Mobile Number
3. Email Address
4. College Name
5. Number of Attendees

Form Headline

Register for College Fest 2026 🎉

Form Description

Register now to receive event updates, venue details and entry information.

Thank-You Message

You're Registered! 🎉
Thank you for registering for College Fest 2026. We'll send the event details and updates to your registered mobile number or email.

Automated Follow-Up

After the user submits the form, the lead will be saved in a **CRM or Google Sheet**, and an automated confirmation message/email will be sent.

Sample Follow-Up Message:

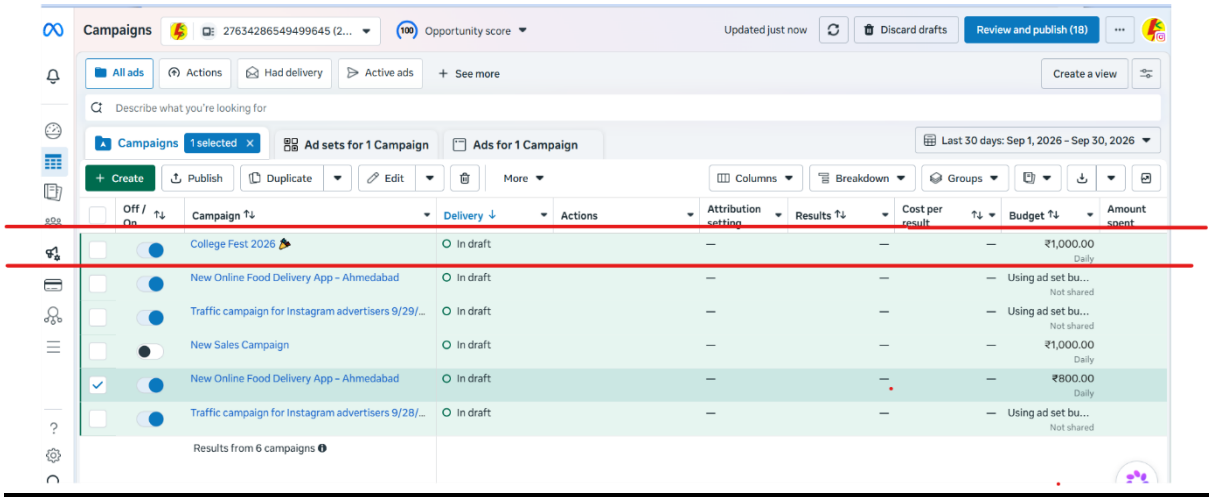

Hi [Name]! Your registration for College Fest 2026 has been received successfully. We'll send you the event details and updates soon.

Lead Generation Funnel

Meta Ad → Instant Form → Lead Captured → Google Sheet/CRM → Automated Confirmation → Event Registration

Expected Outcome

The campaign will collect relevant attendee information and allow the event organizers to follow up with registered participants before the event.

Task : 4

Meta Ads Reporting Template

Zomato-Style Campaign — One Week Mock Data

https://docs.google.com/spreadsheets/d/1PTLgRfT3y2oNEuVUKyJKd5Wr9mg-mWtlHJhMvuNYN2k/edit?usp=sharing

Trend Analysis

- **Impressions increased** during the week, reaching their highest level on Saturday.
- **Clicks increased consistently**, indicating growing engagement with the campaign.
- **Leads increased** from 45 on Monday to 147 on Saturday.
- **Cost per lead decreased** from ₹40 to ₹25.85, showing improved efficiency in the mock campaign.
- **Conversion rate increased** from 10% to around 14%, indicating that a larger proportion of clicks were converting into leads.

Overall observation :
The campaign performance improved toward the weekend, with higher leads, better conversion rates and lower cost per lead.

TASK : 5

AI-Generated Retargeting Ad Copy

Prompt 1

Prompt used in ChatGPT:

"Write a short retargeting Facebook and Instagram ad for a mobile app that helps users discover the best street food in their city. Target users who previously viewed the app but did not use it. Use a friendly and exciting tone."

AI Output:

🧢 **Still Thinking About That Street Food?** 😉

You checked us out—now it's time to taste the best! 🔥

Discover the top street food spots in your city, find hidden food gems, and satisfy your cravings with just a few taps. 📱✨

Don't just scroll. Go explore! 🌯🍔

👉 Download the app and start discovering today!

Prompt 2

Prompt used in ChatGPT:

"Create a FOMO-style retargeting ad for a street food discovery app. Target users who showed interest but have not yet explored the app. Keep it short and suitable for Instagram."

AI Output:

🔥 **Don't Let the Best Bites Pass You By!** 🧢

The street food everyone's talking about is waiting for you! 👀
Discover hidden food gems, trending spots & must-try bites near you. 😉

 Your next favorite food spot could be just one tap away!

👉 Open the app & start exploring NOW! 🍔🌮

Prompt 3

Prompt used in ChatGPT:

"Write a curiosity-based retargeting ad for a mobile app that helps people discover popular street food places in their city. Use a strong hook and a clear call-to-action."

AI Output:

 What's the One Street Food Spot You Haven't Discovered Yet? 🧢🔥

There are hidden food gems waiting to be explored in your city! 👀
Find popular street food places, trending bites, and local favorites—all in one app. 😉

👉 **Open the app and discover your next favorite food spot!**

My Favorite Prompt: Prompt 3 – Curiosity-Based Retargeting Ad

I would choose Prompt 3 because it uses a strong curiosity-based hook: **"What's the One Street Food Spot You Haven't Discovered Yet?"** This makes users curious about what they might be missing and encourages them to explore the app.

It is also short, engaging, and suitable for Instagram and Facebook. The clear call-to-action, **"Open the app and discover your next favorite food spot,"** directly encourages users to take action.

SESSION : 7

MESSENGER MARKETING , SCALING & CLINET ACQUISITION

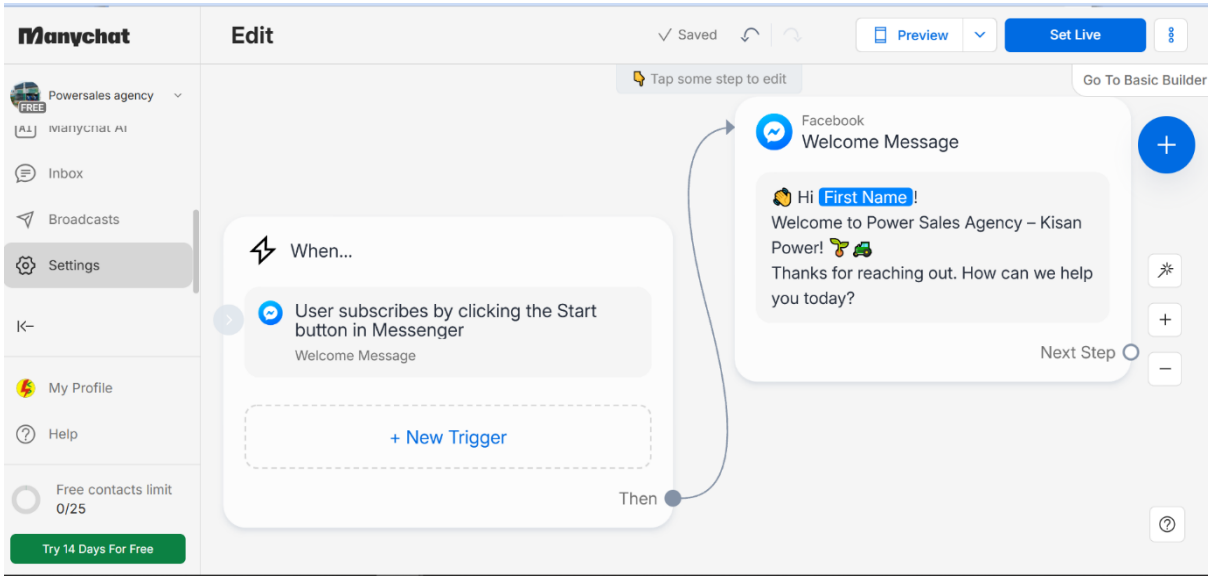

TASK: 1

ManyChat Messenger Welcome Message

Tool Used: ManyChat

Setup: A free ManyChat account was created and Facebook Messenger was connected.

Welcome Message: 👋 Hi {{first_name}}!
Welcome to Power Sales Agency – Kisan Power! 🌱🚜
Thanks for reaching out. How can we help you today?

TASK : 2

Create a Messenger Menu Automation for a Food Delivery Page

Create a Messenger automation for **Food Bucket**, a food-delivery style Facebook page. When a user types the keyword **"menu"**, the automation should display different food categories using Quick Replies and show a sample dish based on the selected category.

Automation Setup

Facebook Page: Food Bucket
Platform: Facebook Messenger
Trigger: User sends a message containing the keyword **"menu"**

Trigger Keyword

Keyword: menu

Welcome Menu Message

When the user sends **"menu"**, the bot responds:

🍽 **Welcome to Food Bucket!**
What would you like to order today?
Please select a category below:

Quick Replies

1. 🍕 **Pizza**
2. 🍛 **Biryani**
3. 🥡 **Chinese**

Automated Responses

If the user selects Pizza:

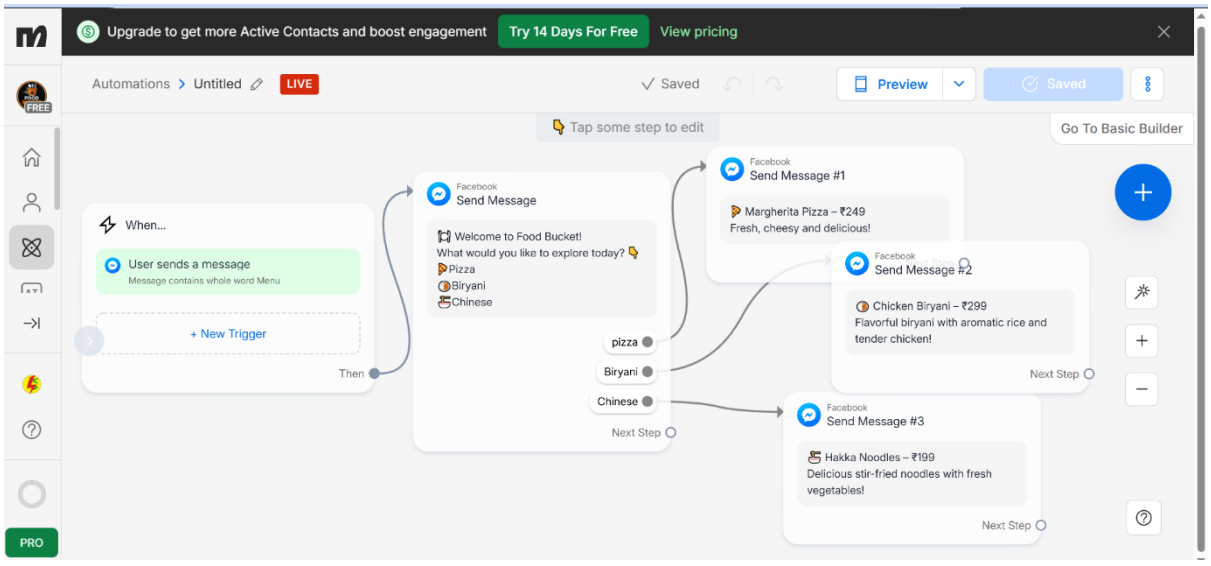

🍕 **Pizza**
Margherita Pizza – ₹249
Freshly baked with tomato sauce, mozzarella and herbs.

If the user selects Biryani:

🍛 **Biryani**
Chicken Biryani – ₹299
Flavorful basmati rice cooked with chicken and aromatic spices.

If the user selects Chinese:

🥢 **Chinese**
Hakka Noodles – ₹199
Delicious stir-fried noodles with fresh vegetables and Chinese-style seasoning.

TASK : 3

Title: Facebook Ads Campaign Draft – ABO vs CBO

Objective:
To understand the difference between Ad Set Budget Optimization (ABO) and Campaign Budget Optimization (CBO) and decide which budgeting method is suitable for a new e-commerce launch.

1. ABO – Ad Set Budget Optimization

In ABO, the budget is set separately at the **Ad Set level**. Each ad set receives its own fixed budget.

Example:

- Ad Set 1 – ₹300/day
- Ad Set 2 – ₹300/day
- Ad Set 3 – ₹300/day

This gives better control over how much money is spent on each audience.

2. CBO – Campaign Budget Optimization

In CBO, the budget is set at the **Campaign level**. Meta distributes the campaign budget among the ad sets based on where it expects better performance. Meta now commonly refers to this as **Advantage campaign budget**.

Example:

- Campaign Budget – ₹900/day
- Ad Set 1, Ad Set 2 and Ad Set 3 are inside the campaign.
- Meta can allocate more of the budget to the ad set it considers more likely to perform well.

3. ABO vs CBO Comparison

Feature	ABO	CBO
Budget Control	Ad Set level	Campaign level
Budget Distribution	Manual	Meta automatically distributes
Audience Testing	More control	Less direct control
Optimization	Manual	More automated
Best For	Testing different audiences	Scaling campaigns

4. Which One Should Be Used for a New E-commerce Launch?

For a **new e-commerce launch, I would start with ABO** because it provides better control over the budget for each audience. It allows me to test different audiences and compare their performance before increasing the budget.

Once I identify the best-performing audiences and ads, I can switch to **CBO** for scaling. CBO can automatically distribute the campaign budget toward better-performing ad sets.

ABO is better for the initial testing stage, while CBO can be useful for scaling a successful campaign.

Task : 4

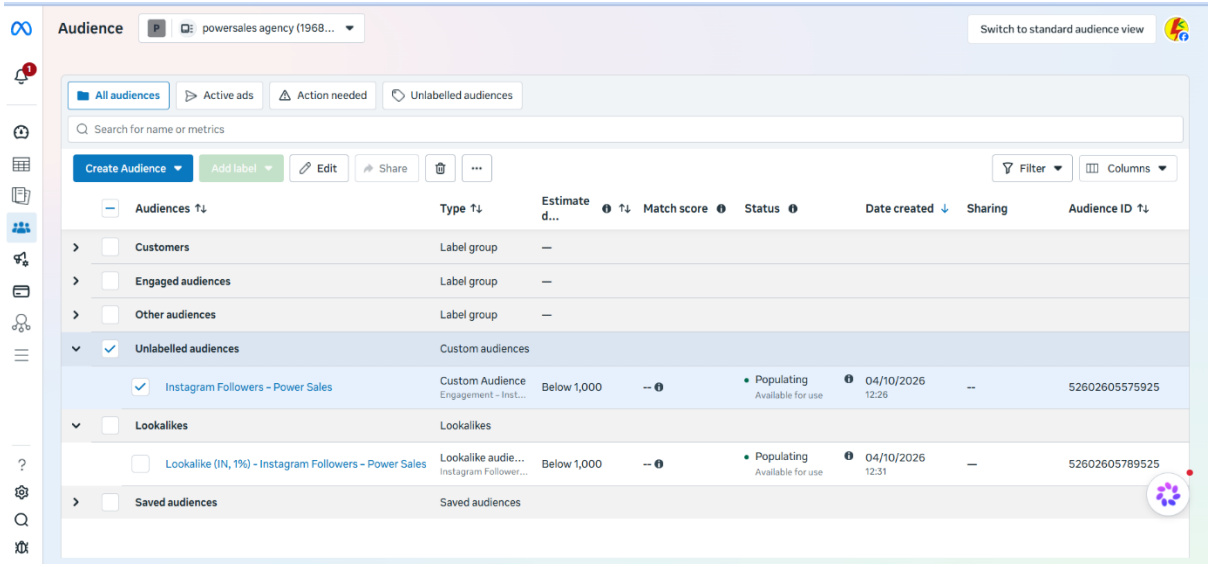

Lookalike Audience

1. What is a Lookalike Audience?

A Lookalike Audience is a Meta Ads audience that helps businesses reach new people who are similar to an existing audience. A **1% Lookalike Audience** targets people who are most similar to the selected source audience.

2. 1% Lookalike Audience Created

Source: Instagram Followers – Power Sales
Location: India
Audience Size: 1%
Audience Name: Lookalike (IN, 1%) – Instagram Followers – Power Sales

---

3. Scaling Scenario 1 – New Cities

A music event ticketing app can use a 1% Lookalike Audience based on existing ticket buyers to reach similar potential customers in new cities.

4. Scaling Scenario 2 – Increase Audience Size

If the 1% Lookalike Audience performs well, the app can test larger Lookalike Audiences such as **2%–5%** and gradually increase the advertising budget to reach more potential customers.

Task : 5

Cold Outreach Using ChatGPT

professional and friendly cold outreach message to pitch **Facebook Ads and Messenger Automation services** to a local business.

Business Selected: Local Cafe

Prompt Used in ChatGPT:

“Write a short, professional and friendly cold outreach message for pitching Facebook Ads and Messenger automation services to a local cafe. Mention how targeted Facebook and Instagram ads can help attract new customers and how Messenger automation can answer common questions and engage customers. Keep the message personalized, concise, and suitable for WhatsApp or Instagram DM.”

Generated Cold Outreach Message:

Hi [Cafe Name]! 👋
I came across your cafe and really liked what you’re offering. I believe targeted Facebook and Instagram Ads could help you reach more local customers and attract new visitors.

I also provide Messenger automation that can instantly answer common questions, share offers, and engage customers even when you’re not available.

Would you be open to a quick chat about how these services could help your cafe attract more customers? ☺

Personalization:

Hi **[Cafe Name]**, I noticed that your cafe has a great food and ambience offering. I believe targeted Facebook and Instagram Ads could help you reach more people in your local area, while Messenger automation could help you answer customer questions and engage with potential customers quickly. Would you be open to a quick chat about it?

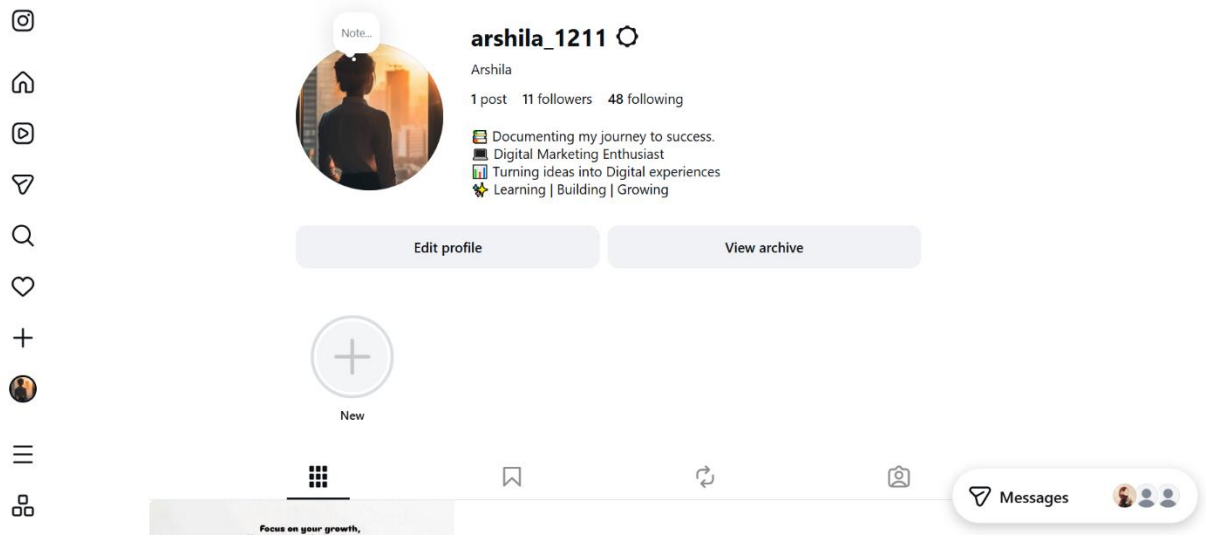

SESSION 8

INSTAGRAM PROFILE MASTERY & GROWTH STRATEGY

Task : 1

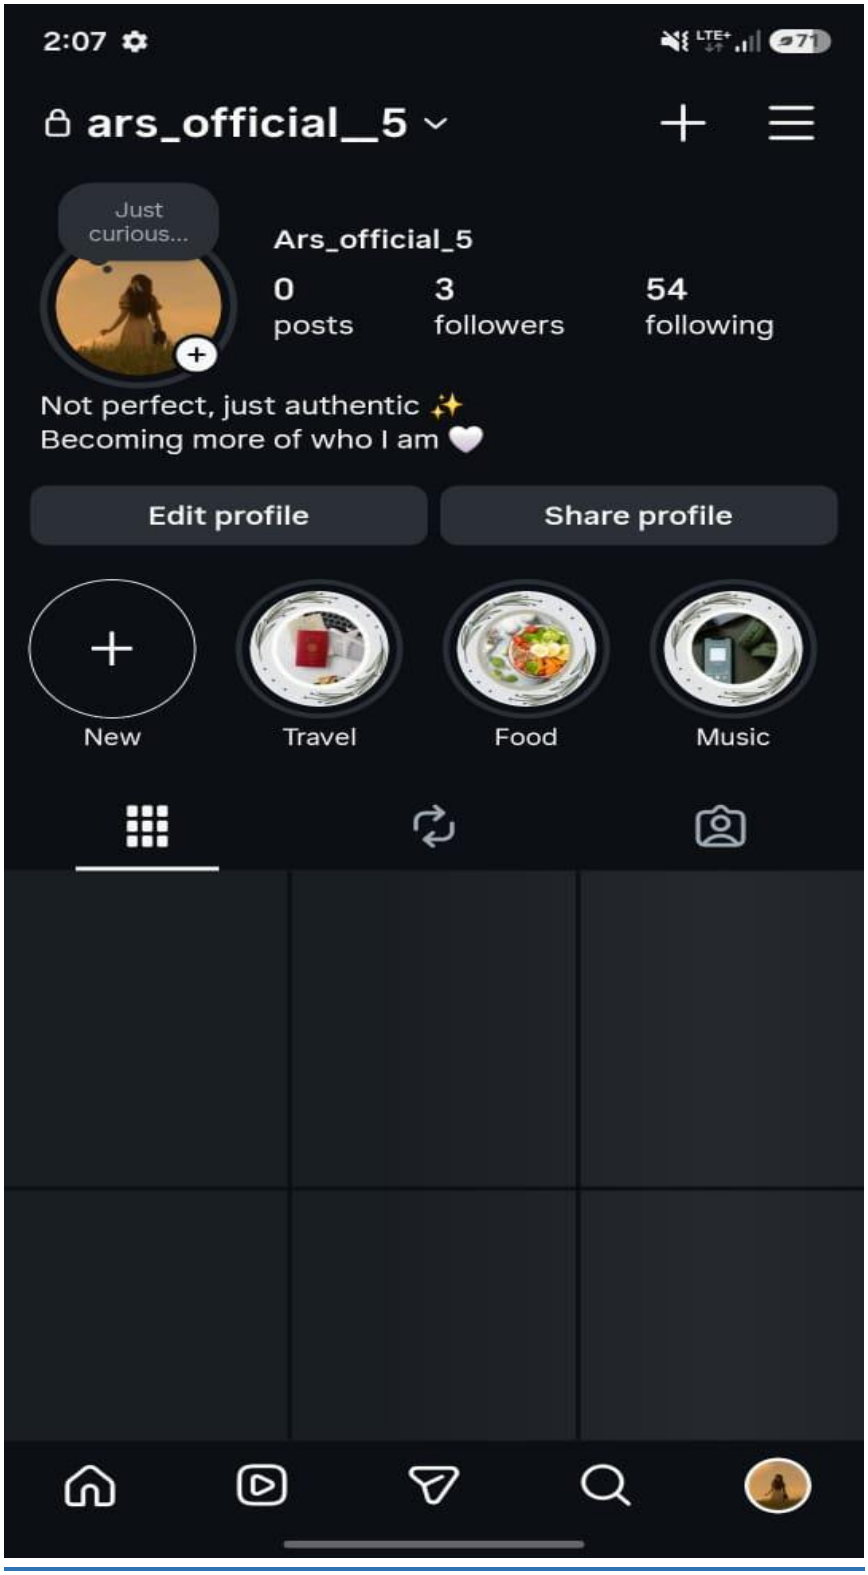

INSTAGRAM PROFILE BIO

Username: @arshila_1211

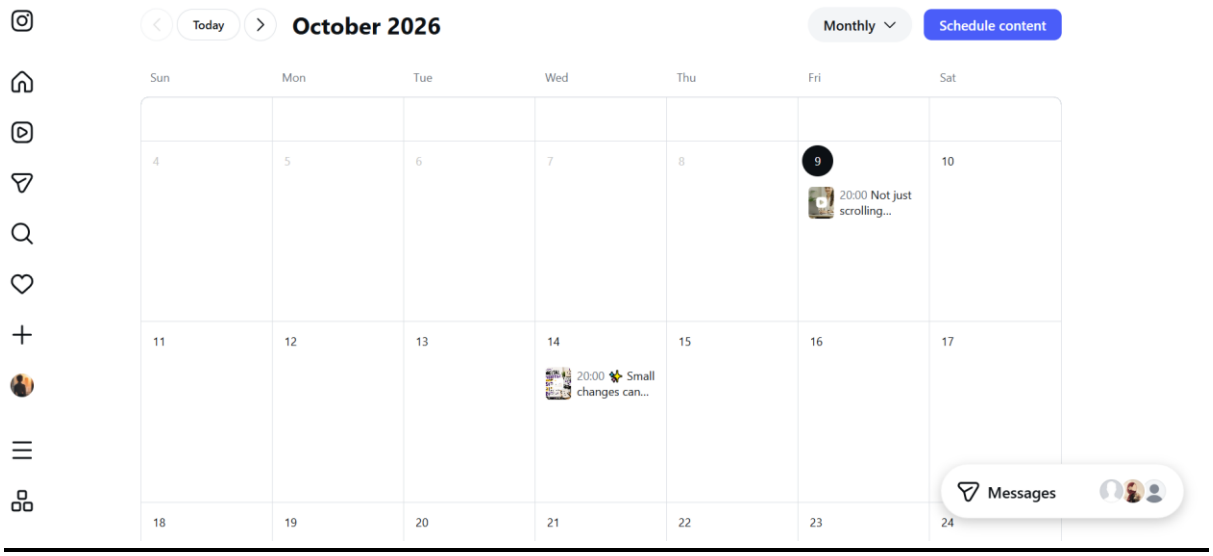

Task : 2

Instagram Story Highlight

Task : 3

Schedule an Instagram post and a Reel

Task : 4

Trending Hashtags & High-Search Keywords

A. 10 Relevant Hashtags

No.	Hashtag	Why it can help reach more people
1	**#DigitalMarketing**	Core hashtag for your niche and helps categorize your content around digital marketing.
2	**#DigitalMarketingTips**	Reaches people interested in learning practical marketing tips and strategies.
3	**#SocialMediaMarketing**	Relevant to content about Instagram, Facebook and social media strategies.
4	**#ContentMarketing**	Helps connect your content with people interested in creating and promoting content.
5	**#SEO**	Useful for reaching audiences interested in search engine optimization.
6	**#MarketingTips**	Broad marketing hashtag that can attract people looking for useful marketing information.
7	**#AIMarketing**	Relevant to your interest in using AI for marketing activities.
8	**#ContentCreation**	Helps reach creators and people interested in creating social media content.
9	**#DigitalMarketer**	Connects your content with the wider digital-marketing community.
10	**#MarketingStrategy**	Relevant for posts discussing marketing ideas, campaigns and strategies.

How these can help

These hashtags are closely connected to my Instagram theme. They can help Instagram categorize my content and make it easier for people interested in digital marketing, AI, SEO, social media and content creation to discover my posts.

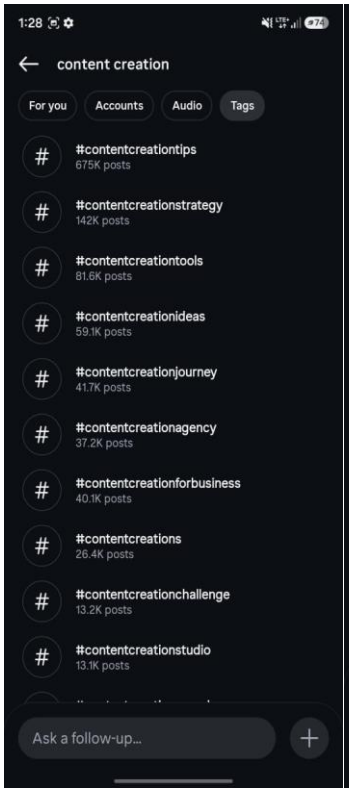

B. 10 High-Search Keywords

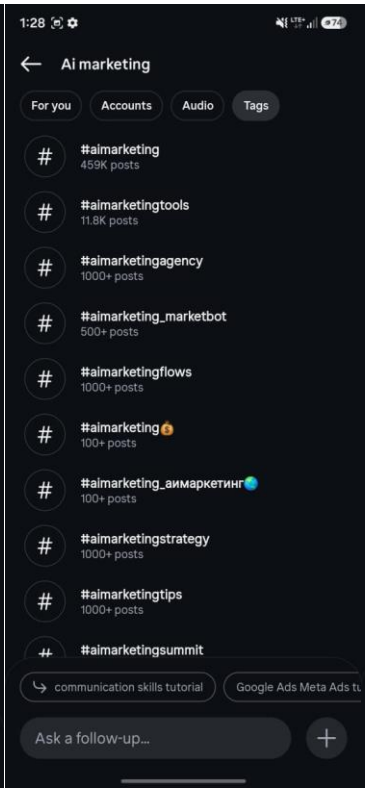

No.	Keyword	Why it can help
1	**Digital marketing**	My main topic and one of the most relevant search terms for my account.
2	**Digital marketing tips**	Targets people looking for practical marketing advice.
3	**Social media marketing**	Helps reach people interested in marketing through social platforms.

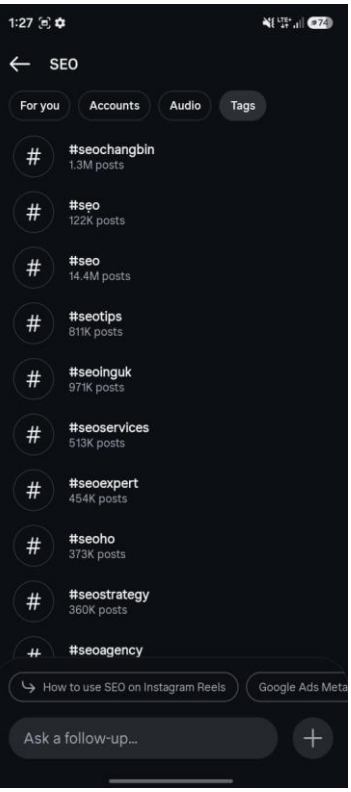

No.	Keyword	Why it can help
4	**SEO tips**	Relevant to users searching for ways to improve website visibility.
5	**Content marketing**	Connects with people interested in creating and promoting valuable content.
6	**Instagram marketing**	Highly relevant to an account that creates and studies Instagram content.
7	**Google Ads**	Targets people interested in paid search advertising.
8	**Meta Ads**	Relevant to Facebook and Instagram advertising.
9	**AI in marketing**	Connects my content with the use of AI in modern marketing.
10	**Content creation**	Targets people interested in creating social media content.

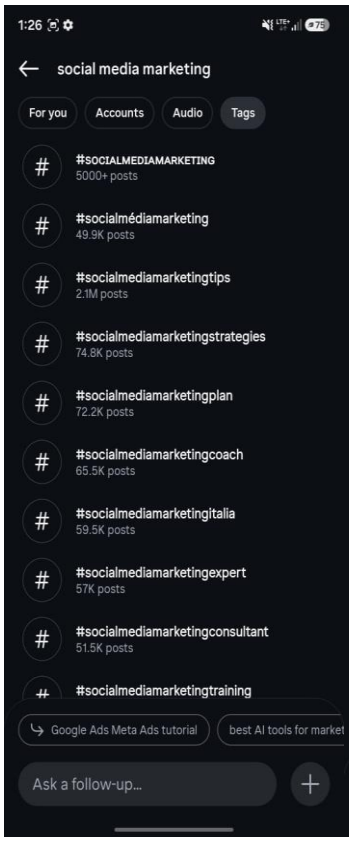

Assignment Answer

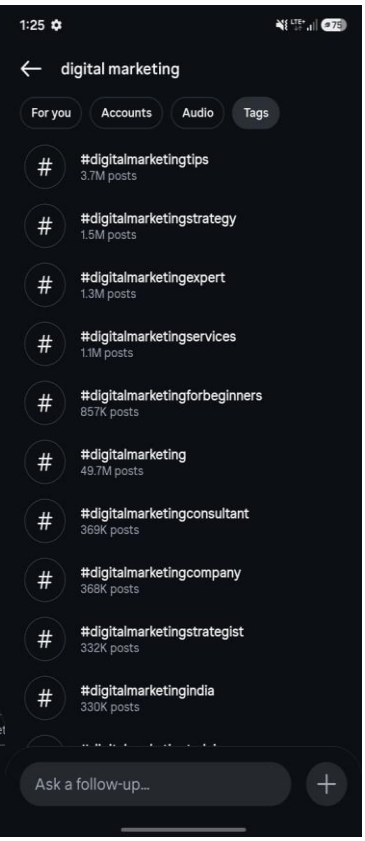

I selected these hashtags and keywords according to my main interests in digital marketing, AI, social media marketing, SEO and content creation. Relevant hashtags help categorize my content and can improve its discoverability among users interested in similar topics. High-search keywords help communicate the topic of my content and make it more relevant to people searching for these subjects.

Task : 5

Instagram Algorithm: Explore & Reels

How the 2026 Instagram Algorithm Prioritizes Content

Instagram does not use one simple algorithm. Different areas of Instagram use different ranking systems.

Explore Page

The Explore page is mainly designed to help users discover content from accounts they don't already follow.

Instagram considers signals such as:

- How likely users are to **like, save, share, or interact** with a post.
- The user's previous activity and interests.
- The popularity and engagement of the content.
- The relationship between the viewer's interests and the content.
- The quality and originality of the content.

Content that receives strong engagement from relevant viewers has a better chance of being recommended to additional people.

Reels Feed

For Reels, Instagram looks at signals such as:

- Whether people **watch the Reel for a long time**.
- Whether people watch it again.
- Likes, comments and shares.
- Whether people send the Reel to others.
- The viewer's previous interests.
- The content's relevance to the viewer.
- The quality and originality of the Reel.

A Reel isn't guaranteed to go viral just because it uses trending audio or hashtags. **Viewer response matters much more than simply adding popular hashtags.**

3 Strategies I Would Use to Grow the Account

Strategy 1 — Create Strong, Original Reels

I would create short food videos with a strong hook in the first few seconds, such as:

“3 foods you must try in Ahmedabad □”

The goal would be to keep viewers watching until the end and encourage replays and shares.

Strategy 2 — Focus on Saves & Shares

Instead of only asking people to like the post, I would create useful content such as:

- “5 best places for pizza”
- “3 budget-friendly food spots”
- “Food places to try this weekend”

I would use CTAs such as **“Save this for later”** and **“Send this to your foodie friend.”**

Strategy 3 — Build a Consistent Food Niche

I would consistently post food-related content rather than randomly switching between unrelated topics.

For example:

Monday: Food recommendation
Wednesday: Food Reel
Friday: Restaurant/Street-food discovery
Weekend: Food Story + Poll

This gives Instagram clearer signals about the type of audience likely to enjoy the account's content.

SESSION 9

INSTAGRAM ALGORITHAM, ADS & CASE STUDIES

Task : 1

Instagram Insights Analysis — Last 10 Posts

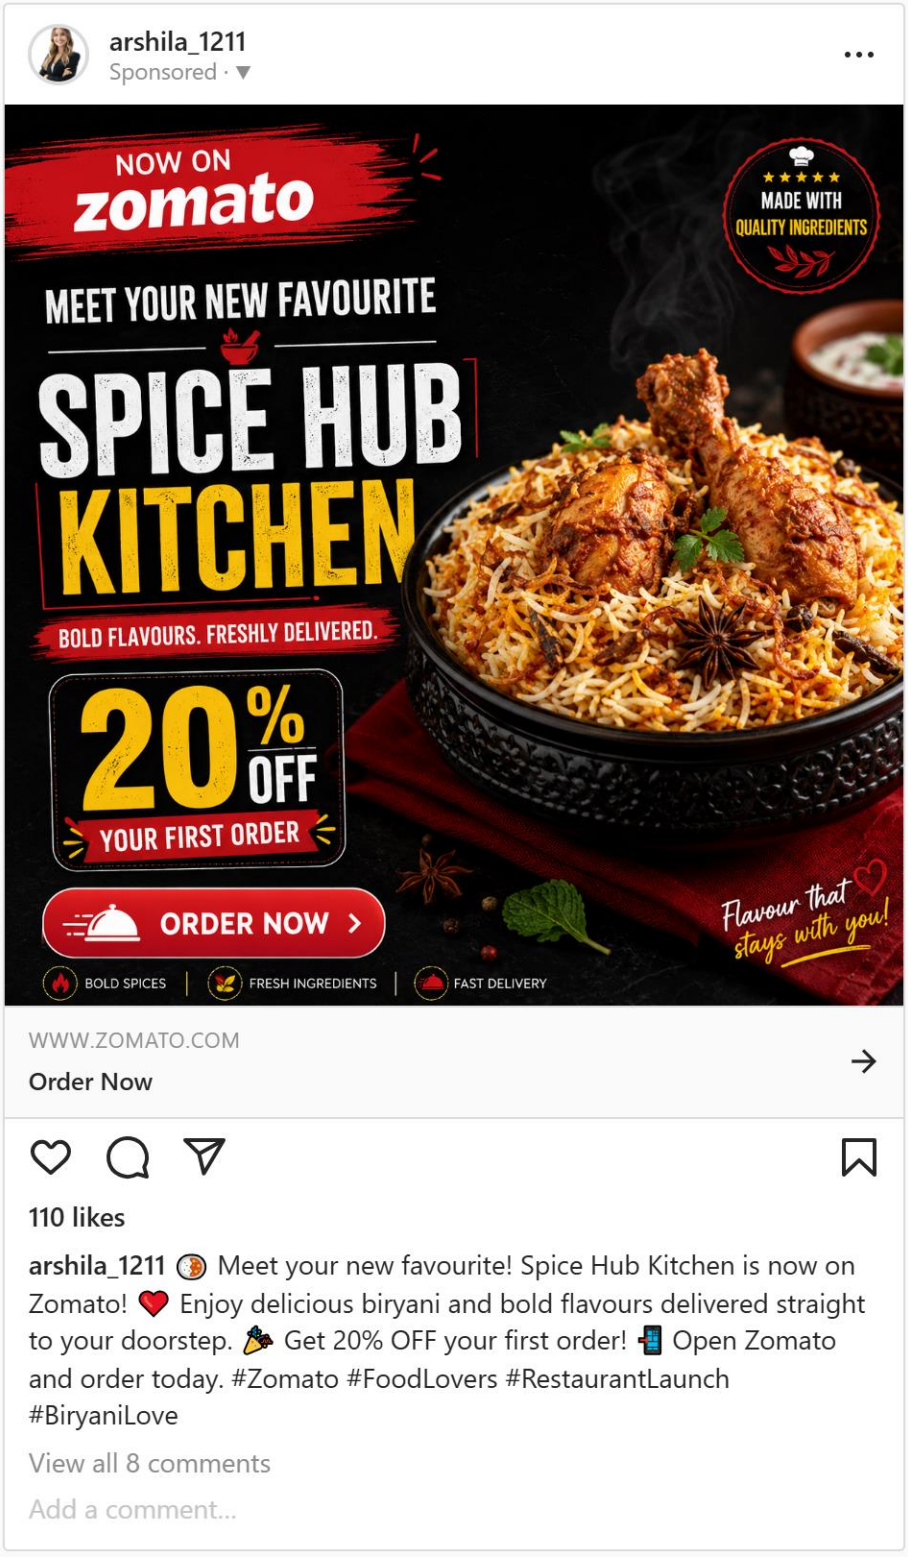

Post	Sends	Likes	Comments	Saves
Post 1 – Digital Marketing Journey	18	125	12	35
Post 2 – SEO Tips	24	98	8	42
Post 3 – AI Marketing Tools	32	145	15	51
Post 4 – Social Media Tips	21	110	9	38
Post 5 – Digital Marketing Quote	12	76	5	19
Post 6 – Content Creation Tips	27	132	11	46
Post 7 – Google Ads Basics	16	89	6	28
Post 8 – Instagram Growth Tips	29	156	18	55
Post 9 – My Learning Journey	35	168	21	63
Post 10 – Canva Design Tips	20	104	7	33

Post with the highest Sends: Post 9 – My Learning Journey, with 35 Sends.

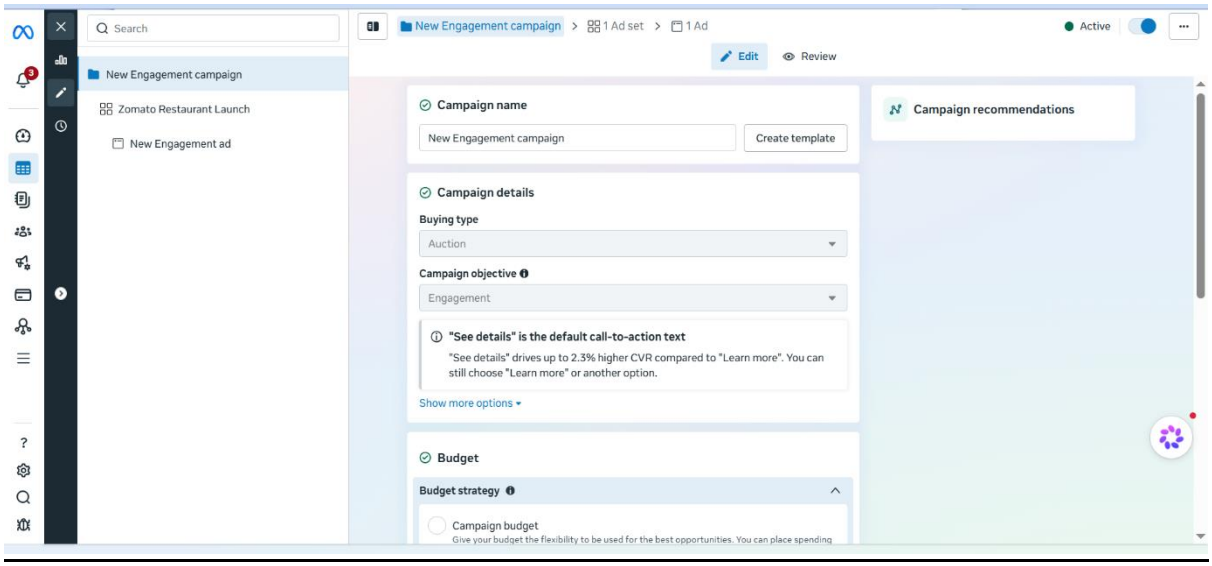

Two reasons for better performance:

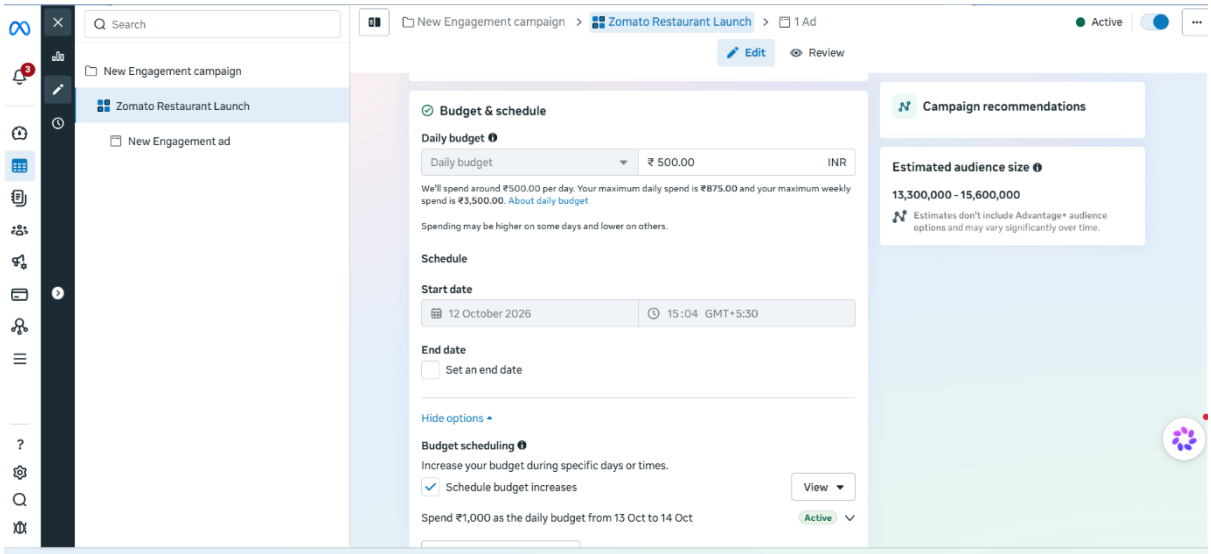

1. The post shared a relatable personal learning experience that encouraged viewers to send it to friends interested in digital marketing.
2. Its engaging content and personal storytelling may have encouraged more interactions and helped Instagram identify it as relevant to viewers.

Brand safety and suitability
Brand safety: Meta applies brand safety to all ads through our Community Standards and Monetisation Policies, keeping your ads away from objectionable content.
Brand suitability: In some cases, brands want more control over where ads can appear. Brand suitability filters or excludes specific topics or publishers. Bear in mind that using these controls can lower your reach and increase costs.

Brand Research — Duolingo Instagram Strategy

Brand: Duolingo

Duolingo uses humor, creative storytelling, and interactive content to engage its Instagram audience.

Three tactics used by the brand:

1. Trending humor and memes: Duolingo uses relatable jokes and trending topics to create shareable Reels. This can increase shares, watch time, and organic reach.

2. Character-based storytelling: Its green owl mascot, Duo, appears in entertaining situations and recurring stories. This builds brand recognition and encourages people to follow the account for more content.

3. Interactive content: Polls, quizzes, and audience participation encourage followers to engage with its content. These interactions can provide feedback and help the brand understand audience interests.

Conclusion: Duolingo combines entertainment with brand identity to create memorable content that encourages engagement and strengthens audience loyalty.

Task : 5

Three Instagram Reel Ideas for an Indie Music Artist

Prompt used in ChatGPT:

Generate 3 creative Instagram Reel ideas for an indie music artist to maximize Sends and Saves. Include a hook, concept, on-screen text, and call to action for each idea. Focus on emotional storytelling, music discovery, and relatable experiences.

AI-generated response:

Idea 1: Send This Song to Someone Special

- Hook: “Some songs say what we cannot.”
- Concept: Use an emotional section of the artist's original song with cinematic sunset and nighttime visuals.
- On-screen text: “For the person you still think about.”
- CTA: “Send this to someone who needs to hear it.”

Idea 2: Behind the Song

- Hook: “I wrote this song at 2 AM after one difficult night.”
- Concept: Show the songwriting process, notebook lyrics, and studio recording.
- On-screen text: “From a simple thought to a song.”
- CTA: “Save this Reel for later.”

Idea 3: Wait for the Final Chorus

- Hook: “The last 10 seconds change everything.”
- Concept: Start with a quiet verse and build toward the strongest chorus.
- On-screen text: “Wait for the drop.”
- CTA: “Save this track for your playlist.”

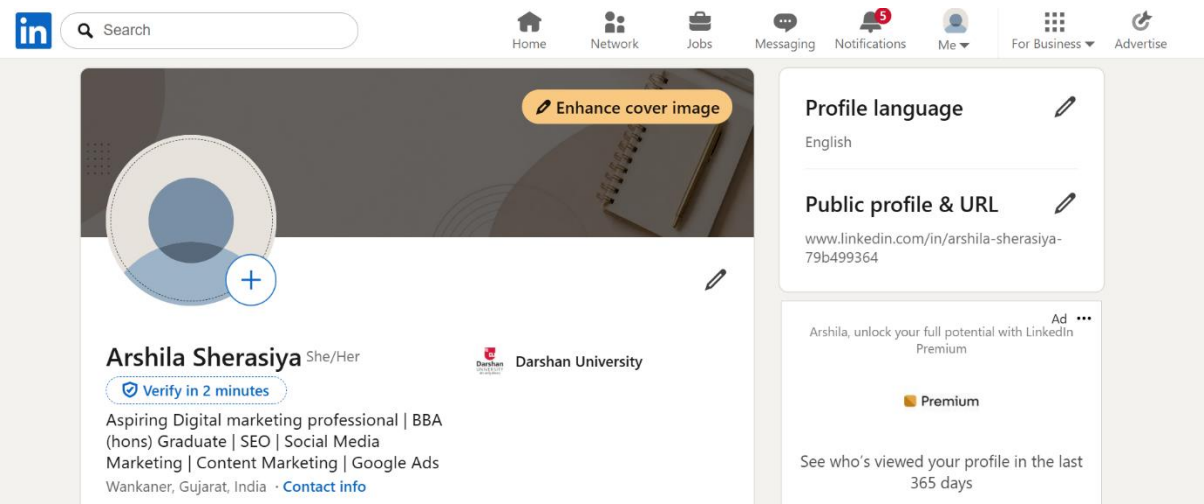

My Favorite Idea: Idea 1 — Send This Song to Someone Special.

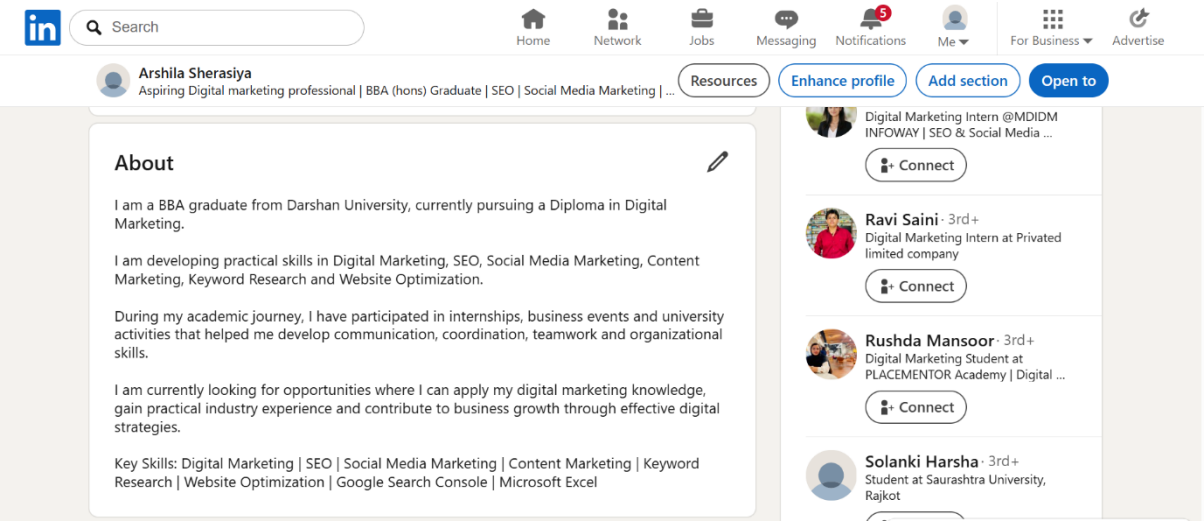

Reason: Emotional content can create a personal connection with viewers and give them a reason to share the Reel privately with friends. The strong opening hook and relatable message make it suitable for increasing Sends, while the song may also encourage Saves.

SESSION : 10

LINKDIN FOR BUSINESS – PROFILE CONTENT & COMPARISON

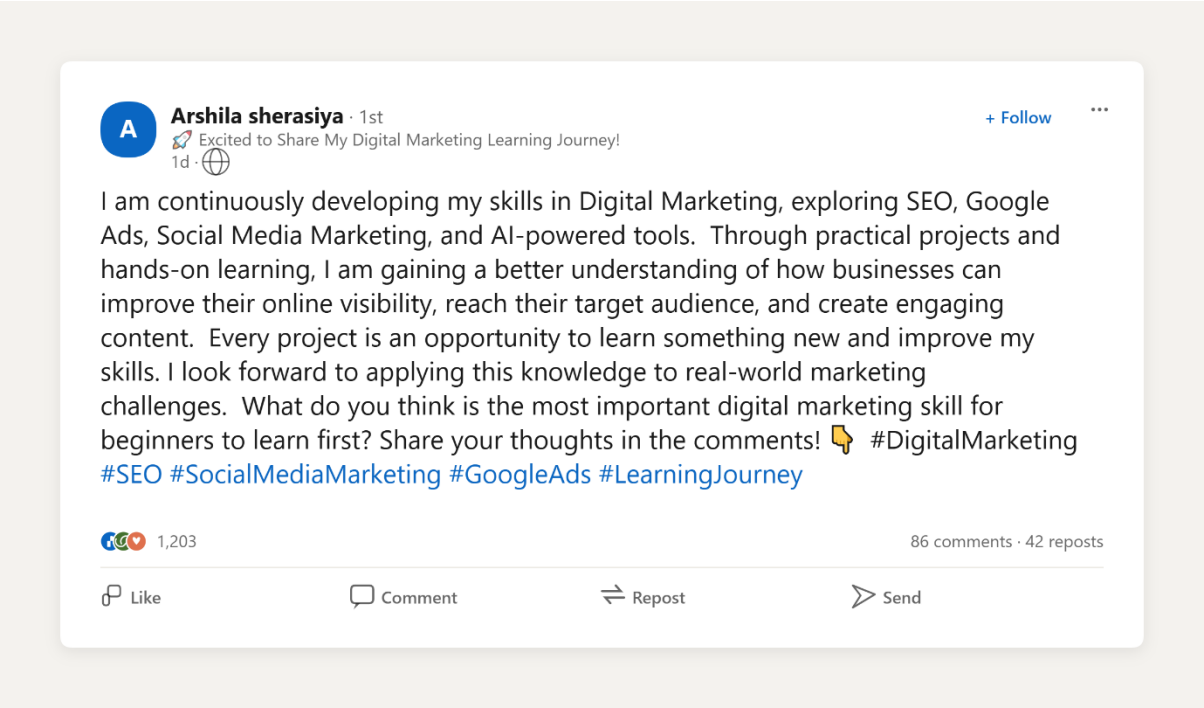

TASK : 1

TASK : 2

Write and Publish a LinkedIn Post

TASK : 3

Three Best Practices for LinkedIn Business Page Optimization

Best practice	How it helps with lead generation
1. Complete the company profile	Add a professional logo, banner, company description, website, and contact details. A complete profile builds trust and helps potential customers understand the business.
2. Publish valuable and consistent content	Share industry tips, case studies, customer success stories, and useful updates. Relevant content increases engagement, visibility, and interest in the company's services.
3. Use clear calls-to-action (CTAs)	Encourage visitors to contact the business, visit its website, request a demo, or enquire about services. Clear CTAs guide interested people toward becoming leads.

Task : 4

Facebook vs. LinkedIn for Business Marketing

Comparison point	Facebook	LinkedIn
1. Audience	General consumers, communities, and businesses	Professionals, recruiters, decision-makers, and businesses
2. Content style	Entertaining videos, reels, offers, images, and community posts	Professional updates, industry insights, case studies, and thought leadership
3. Ad formats	Image, video, carousel, Stories, lead ads, and Messenger ads	Sponsored Content, video ads, carousel ads, Message Ads where available, and Lead Gen Forms
4. Engagement	Reactions, comments, shares, group discussions, and messages	Professional discussions, comments, reposts, and networking
5. Analytics	Meta Business Suite and Ads Manager provide reach, engagement, and campaign metrics	LinkedIn Page analytics and Campaign Manager provide engagement, audience, and advertising performance metrics
6. Main marketing goal	Brand awareness, community growth, consumer sales, and local business promotion	B2B lead generation, professional networking, recruitment, and business development

Conclusion: Facebook is generally suitable for reaching broad consumer audiences, while LinkedIn is particularly useful for professional networking and B2B marketing. The better platform depends on the business's target audience and objectives.

Task : 5

Steps to Set Up a Sponsored Content Ad in LinkedIn Campaign Manager

Step 1: Open Campaign Manager

Log in to LinkedIn, open LinkedIn Campaign Manager, and select or create an advertising account associated with the business.

Step 2: Create a campaign

Create a campaign within a campaign group. Select an objective such as Brand Awareness, Website Visits, or Lead Generation, depending on the business goal.

Step 3: Choose the target audience

Select the audience using relevant options:

- Location: Gujarat or another target market.
- Job title: Marketing Manager, Business Owner, or another relevant role.
- Industry: Choose industries related to the product or service.
- Company size: Select appropriate business sizes.
- Skills or interests: Use relevant professional targeting options where available.

Avoid selecting too many unrelated targeting criteria.

Step 4: Select the ad format

Choose Single Image Ad under Sponsored Content. Other available formats may include video, carousel, and document ads, depending on the campaign setup.

Step 5: Create the advertisement

Select the business LinkedIn Page, upload an appropriate image, and write the introductory text and headline. Add a destination URL and a suitable call-to-action, such as Learn More or Sign Up.

Step 6: Set the budget and schedule

Choose a daily or total budget, set the start and end dates, and review the available bidding options. For this assignment, use a small hypothetical budget suitable for the business.

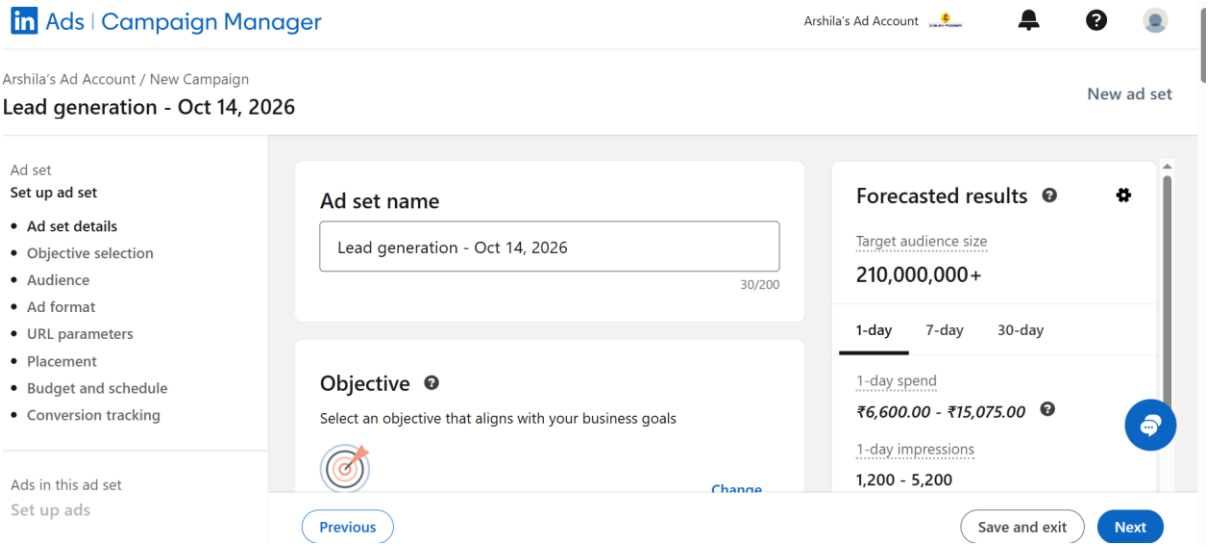

Step 7: Review and save

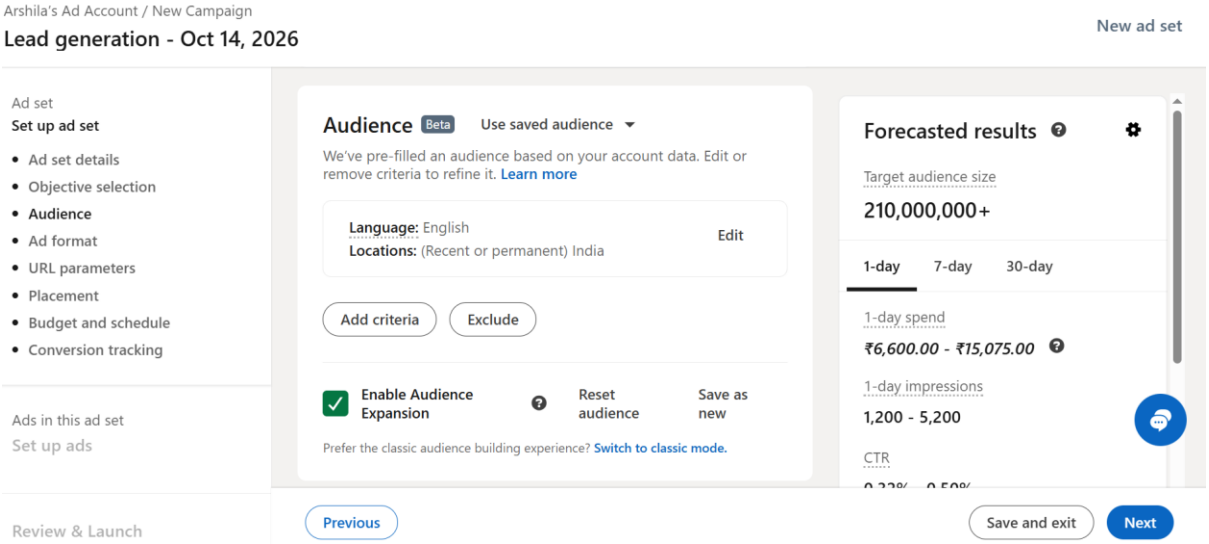

Check the audience, ad creative, destination URL, budget, and schedule. Save the draft or leave the campaign unpublished. The assignment does not require you to launch the ad.

TASK : 5

Two Safe LinkedIn Automation Tools

1. Supermetrics

- Purpose: Automates LinkedIn Ads data collection for reports.
- Key feature: Transfers campaign metrics into Google Sheets, Looker Studio, and other reporting destinations.
- Safety tip: Connect through official authentication, grant only necessary permissions, and never share your LinkedIn password with third parties.
- Best use: Automated reporting and performance analysis.

2. OWOX BI

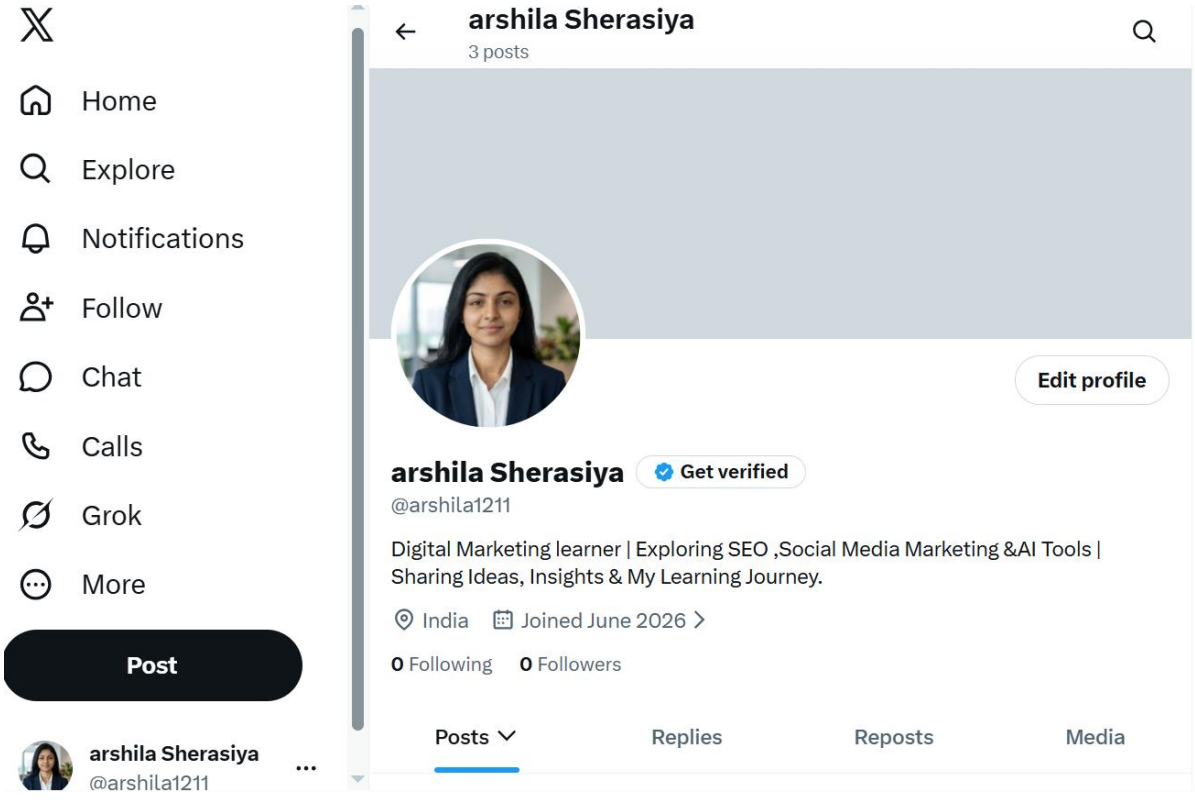

- Purpose: Collects and combines LinkedIn Ads data with website analytics and other marketing data.
- Key feature: Automated data imports and cross-channel reporting through platforms such as Google BigQuery and Google Analytics 4.
- Safety tip: Use authorized account access, restrict data permissions, and review connected apps regularly.
- Best use: Centralized reporting and campaign performance analysis.

Can AI make digital marketing smarter? 🤖📈
From creating content to analyzing campaigns, AI is changing how marketers work. But is AI a replacement for creativity—or a tool that makes us better?
Let's discuss! 🧵

Here are 3 ways marketers can use AI:
1 Generate content ideas and captions
2 Analyze campaign performance
3 Personalize content for different audiences
The real advantage comes from combining AI with human creativity and strategy. 💡

Task : 3

Analyze Your X (Twitter) Feed

After analyzing my X (Twitter) feed, I identified these three signals that may influence which tweets appear at the top:

1. Engagement: Tweets with more likes, replies, and reposts may receive greater visibility because they attract users' attention.

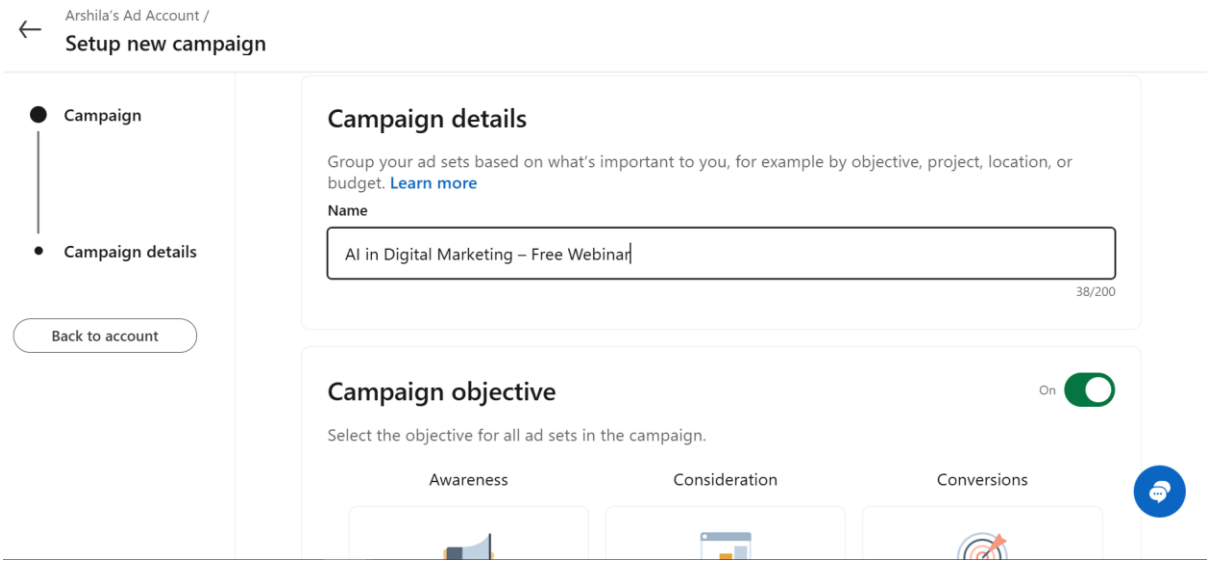

2. Recency: Newer tweets may appear higher in the feed, depending on the selected timeline and relevance.

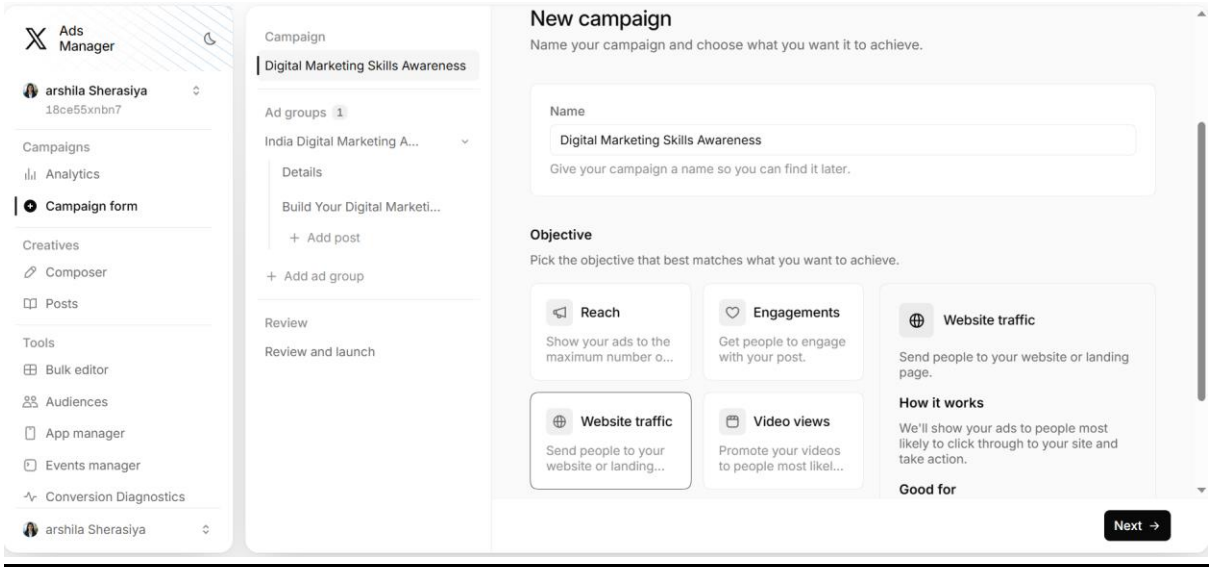

3. Following and Interests: Tweets from accounts I follow and posts related to my interests may appear more frequently in my feed.

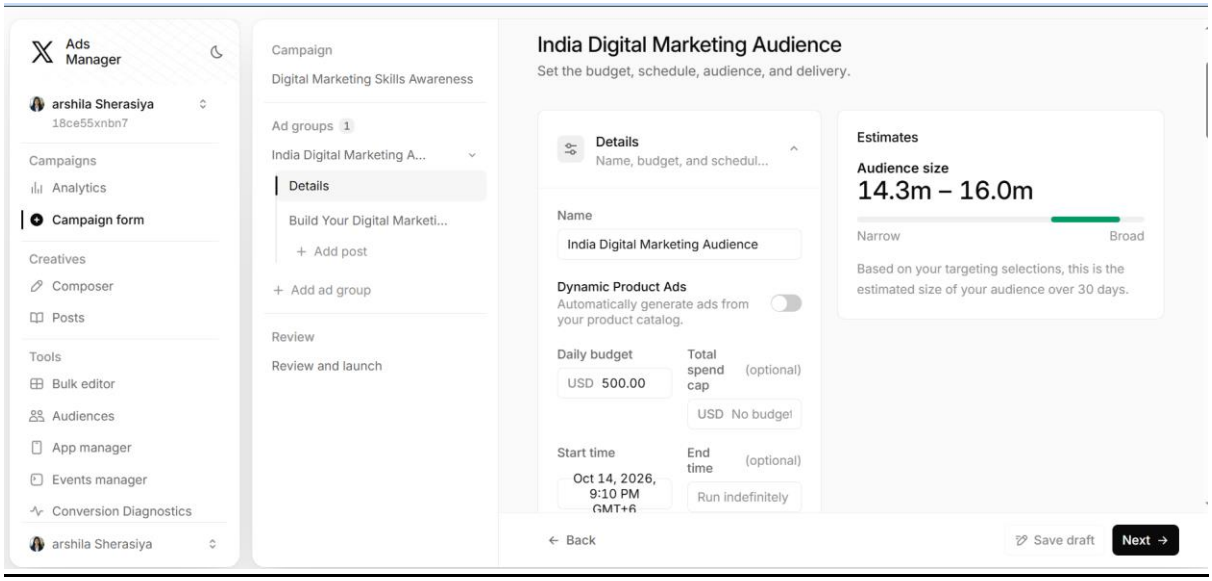

Conclusion:

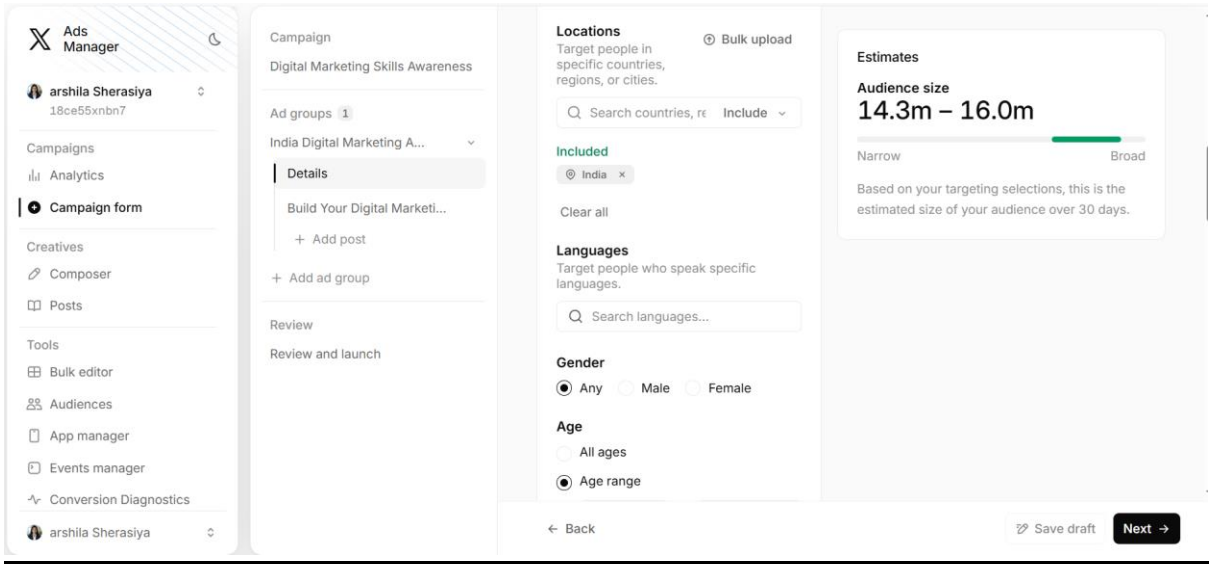

X uses a recommendation algorithm to rank tweets based on multiple factors, including relevance, engagement, and user activity. The For You feed contains a mixture of posts from followed accounts and recommended content, while the Following feed focuses on accounts I follow. Therefore, my feed is influenced by both my activity and the platform's ranking system.

SESSION 13

X ADS – TYPES, BIDDING , BUDGET & CASE STUDIES

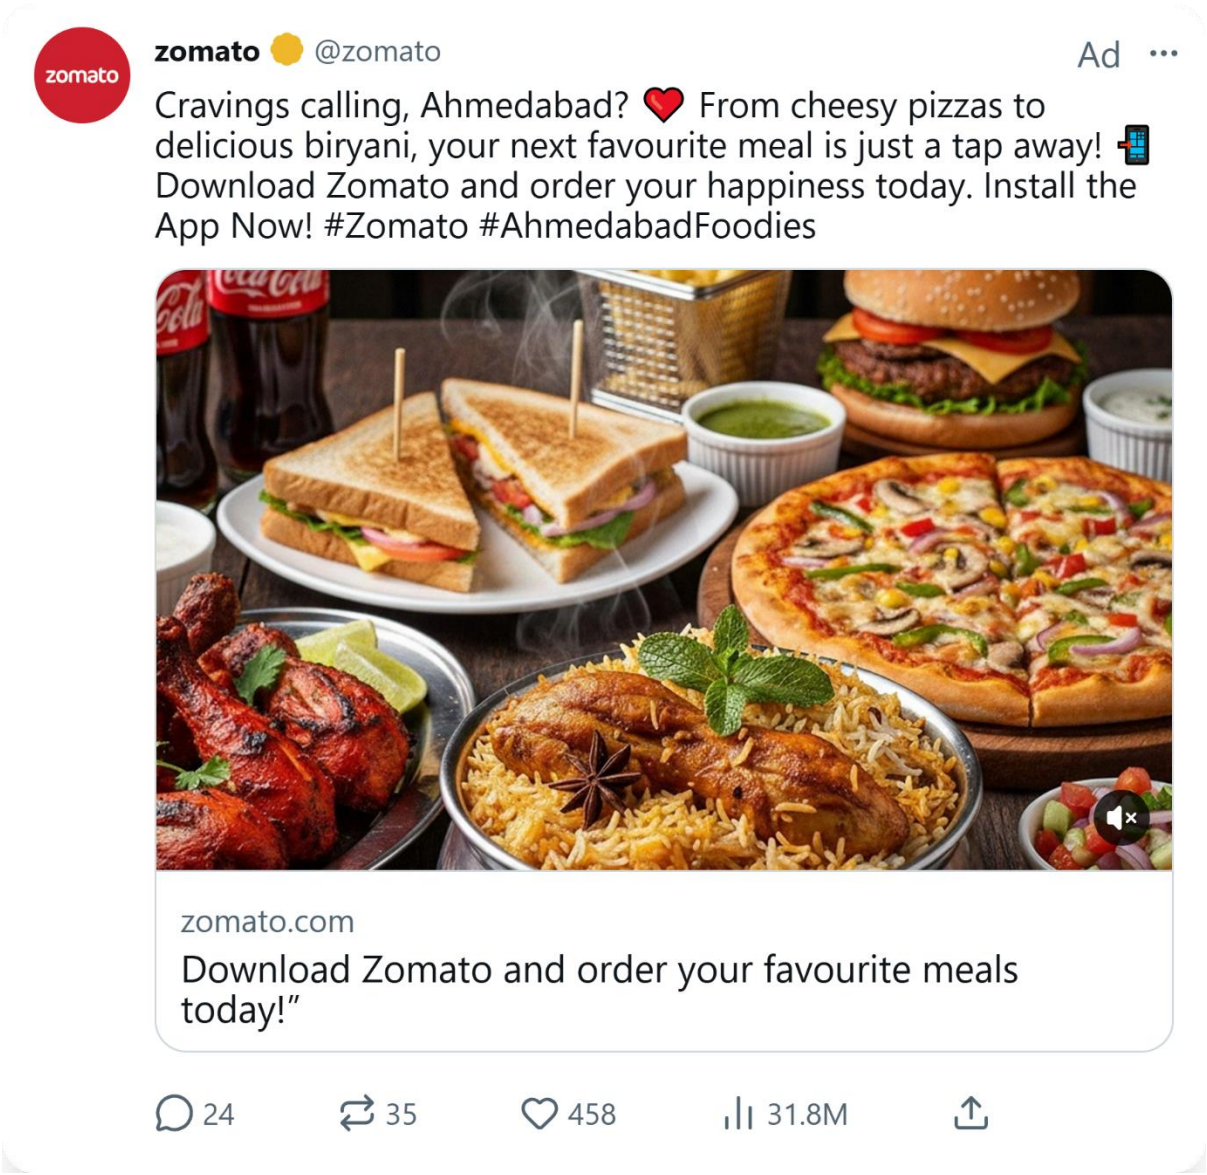

Task : 1

Comparison Between Promoted Tweets, Followers Ads, and App Install Ads

Feature	Promoted Tweets	Followers Ads	App Install Ads
Main Objective	Increase engagement, reach, and website traffic	Increase followers	Encourage users to install an app
Placement	X Home Timeline, search results, and other eligible ad placements	Home Timeline and eligible recommendation placements	Home Timeline and other eligible ad placements
Ideal Use Case	Promoting posts, offers, products, and announcements	Growing a brand's or creator's audience	Increasing app downloads and app users
Example	Promoting a Swiggy food offer	Growing a cricket news handle's followers	Encouraging users to download Zomato

---

Task : 2

zomato
zomato @zomato

Task : 3

₹10,000 Budget Allocation for a Music Playlist App

Campaign Objective: Maximize awareness and attract new users to a music playlist app through X Ads.

Activity	Budget	Purpose
Audience targeting and bidding tests	₹3,000	Test music lovers, age groups, and relevant interests to find responsive audiences
Daily-budget campaign for maximum reach	₹5,000	Reach a larger audience consistently throughout the campaign
Creative testing and optimization	₹2,000	Test different headlines, visuals, and calls-to-action
Total Budget	₹10,000	

Justification:

- ₹3,000 for audience and bidding tests: Identify which audience segments respond best before spending more.
- ₹5,000 for maximum reach: Allocate the largest share to reaching potential users after identifying promising audiences. Set daily spending limits to control costs.
- ₹2,000 for creative testing: Compare different music-themed visuals and ad copy to improve performance.

Conclusion: I would start with controlled testing, then shift more budget toward the best-performing audience and creative. Daily limits help manage spending, but they do not guarantee maximum reach. Actual results depend on bidding competition, audience size, and ad quality.

Task : 4

Brand: Swiggy

Campaign Type: Hypothetical Promoted Tweets campaign.

1. **Objective:** Increase awareness of Swiggy's food delivery services and attract new customers.
2. **Ad Type:** Promoted Tweets featuring popular meals and limited-time discounts.

3. **Target Audience:** Young professionals, students, and food lovers in major Indian cities.
4. **Creative Strategy:** Use mouth-watering food images with short, humorous captions and a clear ordering CTA.
5. **Engagement Strategy:** Encourage users to share their favourite meals and tag friends.
6. **Reason for Potential Success:** Relatable content, appealing food visuals, and relevant offers could encourage engagement and increase orders.

This is a hypothetical campaign example, not a verified report of a specific Swiggy campaign.

Task : 5

Three Headline Ideas for a Cricket News Followers Ad

Campaign: Grow followers for a cricket news handle during IPL season.

Headline 1

“Every IPL Update. Every Big Moment. Follow Us!”

Focus: Complete tournament coverage.

Headline 2

“IPL Fever Is Here! Get Cricket News Before Everyone Else.”

Focus: Timely updates and exclusivity.

Headline 3

“Crazy Sixes. Last-Over Thrillers. Follow IPL Live!”

Focus: Excitement and match-day action.

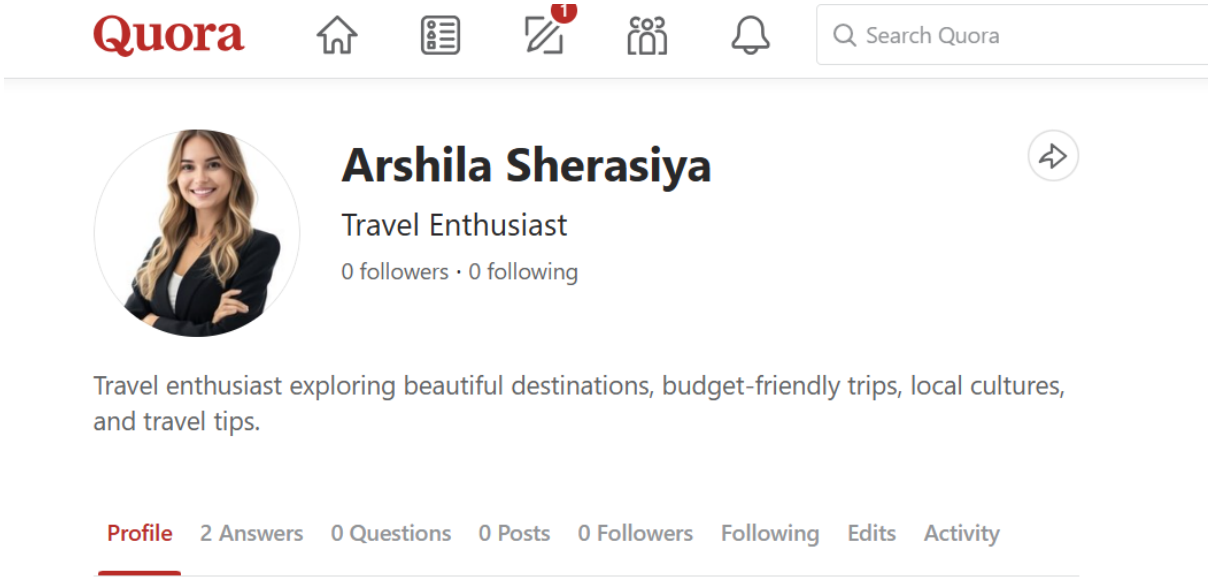

My Choice: Headline 3 – “Crazy Sixes. Last-Over Thrillers. Follow IPL Live!”

I would choose this headline because it uses exciting cricket-related language that connects with IPL fans. It creates an emotional connection with the thrill of live matches and includes a clear call-to-action to follow the handle. It is short, memorable, and suitable for a Followers Ad.

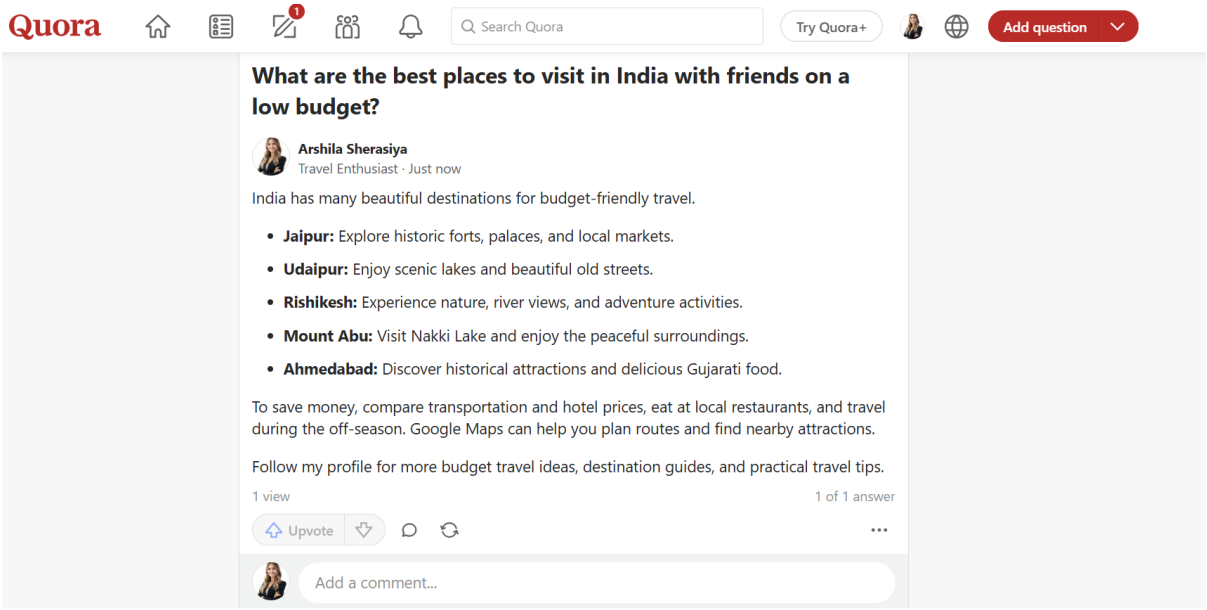

SESSION : 14

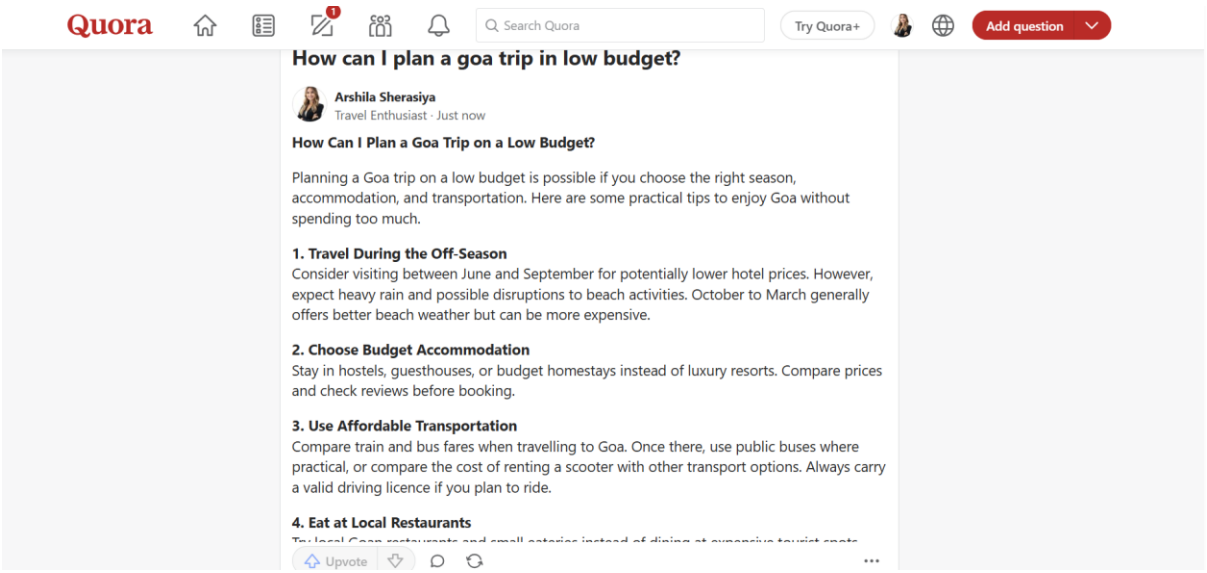

QOURA MARKETING – AUTHORITY BUILDING & ADS

Task : 1

Task : 2

Quora
Search Quora
Try Quora+
Add question
What are the best places to visit in India with friends on a low budget?
Arshila Sherasiya
Travel Enthusiast · Just now
India has many beautiful destinations for budget-friendly travel.
Jaipur: Explore historic forts, palaces, and local markets.
Udaipur: Enjoy scenic lakes and beautiful old streets.
Rishikesh: Experience nature, river views, and adventure activities.
Mount Abu: Visit Nakki Lake and enjoy the peaceful surroundings.
Ahmedabad: Discover historical attractions and delicious Gujarati food.
To save money, compare transportation and hotel prices, eat at local restaurants, and travel during the off-season. Google Maps can help you plan routes and find nearby attractions.
Follow my profile for more budget travel ideas, destination guides, and practical travel tips.

Add question
How can I plan a goa trip in low budget?
Arshila Sherasiya
Travel Enthusiast · Just now
How Can I Plan a Goa Trip on a Low Budget?
Planning a Goa trip on a low budget is possible if you choose the right season, accommodation, and transportation. Here are some practical tips to enjoy Goa without spending too much.
1. Travel During the Off-Season
Consider visiting between June and September for potentially lower hotel prices. However, expect heavy rain and possible disruptions to beach activities. October to March generally offers better beach weather but can be more expensive.
2. Choose Budget Accommodation
Stay in hostels, guesthouses, or budget homestays instead of luxury resorts. Compare prices and check reviews before booking.
3. Use Affordable Transportation
Compare train and bus fares when travelling to Goa. Once there, use public buses where practical, or compare the cost of renting a scooter with other transport options. Always carry a valid driving licence if you plan to ride.
4. Eat at Local Restaurants
Upvote

Task : 3

Analyze the Top 5 Answers to a Trending Quora Question

Sample question: “How can a beginner grow a business online using digital marketing?”

Use five actual high-ranking answers to this or a similar question on Quora, and record their authors and links.

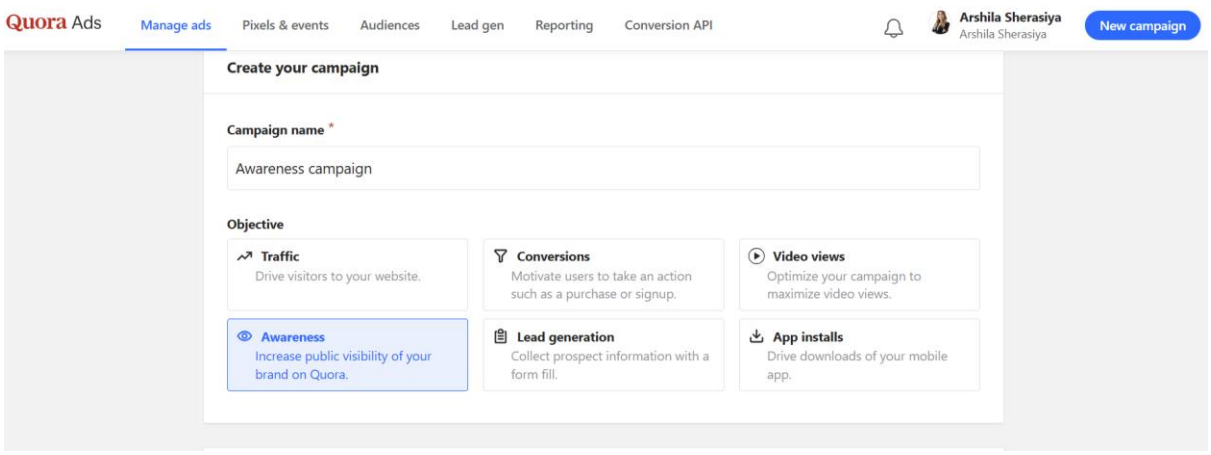

Author	Trust or authority technique to examine
Author 1	Uses statistics, research, or measurable results
Author 2	Shares a personal experience or case study
Author 3	Demonstrates relevant professional experience
Author 4	Explains the process using practical examples
Author 5	Provides credible sources and a clear structure

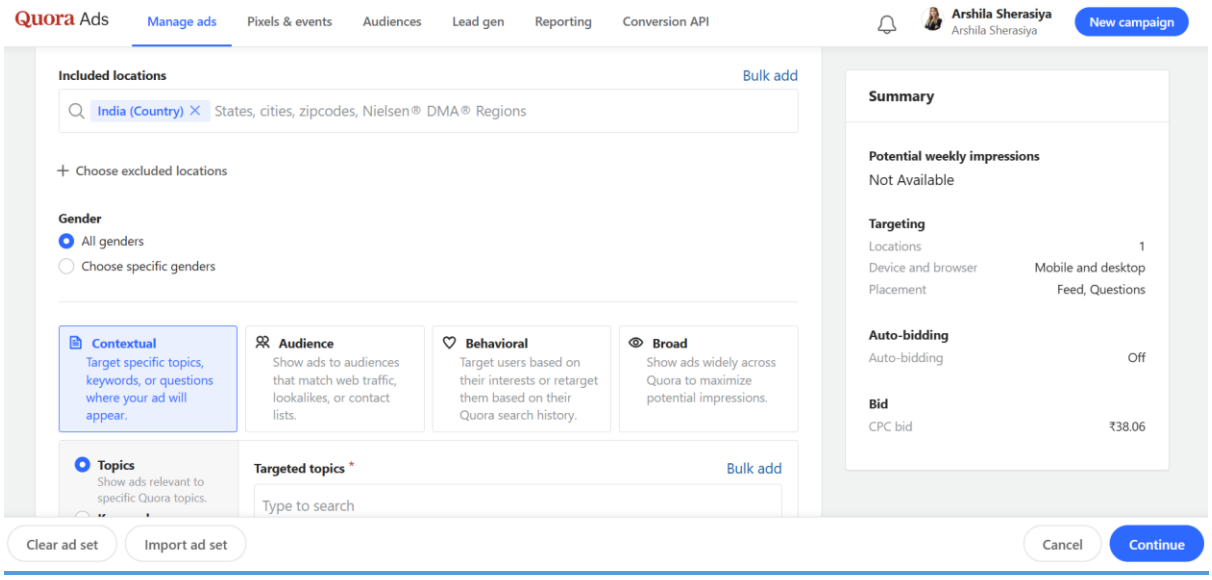

Three strategies that build trust and authority:

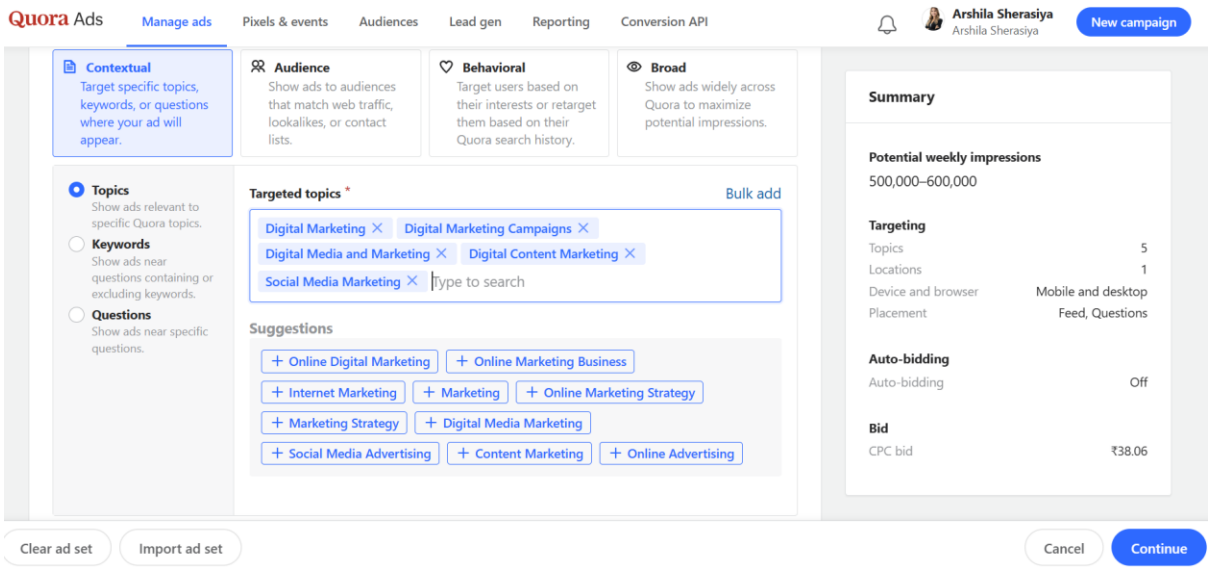

1. Data and evidence: Authors use statistics, research, and measurable results to support their claims rather than relying only on opinions.
2. Storytelling and examples: Real experiences and case studies help readers understand how a strategy works in practice.
3. Profile credibility: Relevant experience, specific expertise, and consistent high-quality answers make an author appear more knowledgeable and trustworthy.

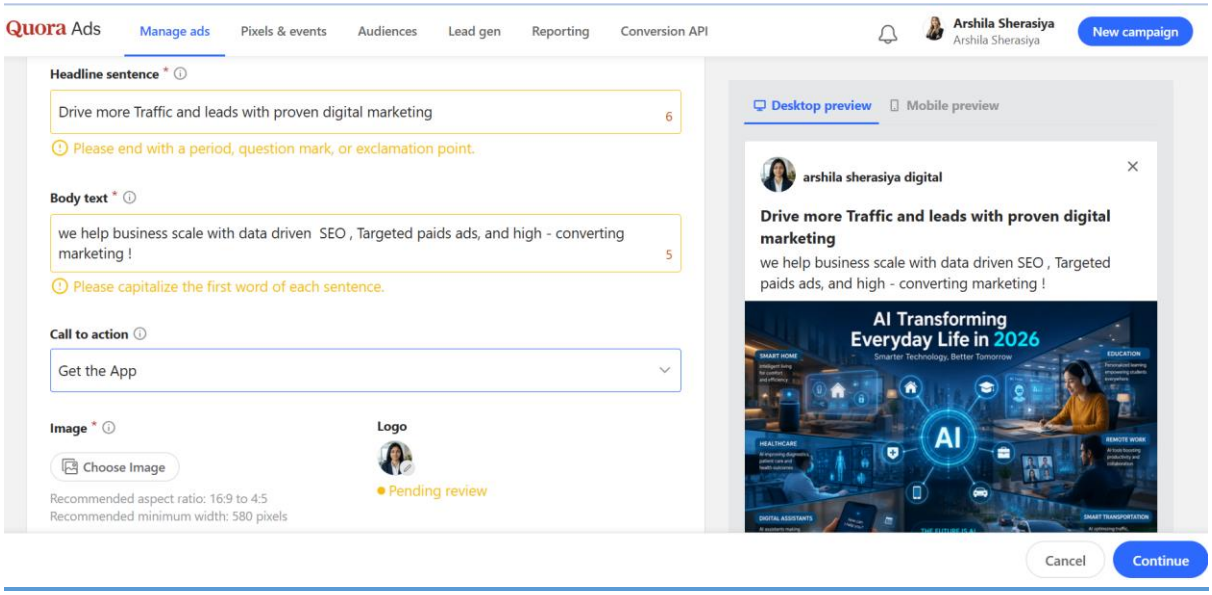

Conclusion: The strongest Quora answers combine useful information, credible evidence, and practical examples. A professional profile supports authority, but the quality of the answer is what earns readers' trust.

Task : 5

Generate Three Alternative Headlines or Answer Hooks Using ChatGPT

Prompt used:

Generate three engaging Quora answer headlines or hooks to promote a Spotify playlist featuring relaxing and focus music. Make each headline different, curiosity-driven, natural, and suitable for readers interested in productivity and music. Avoid exaggerated claims and choose the headline most likely to attract relevant clicks.

Output 1 — Benefit-focused

“Need Better Focus While Studying? Try These Music Picks for Your Next Study Session”

Output 2 — Curiosity-focused

“Can the Right Music Make Your Study Session Feel Easier? Here’s a Playlist to Try”

Output 3 — Problem-solving

“Distracted While Studying? Discover a Relaxing Playlist for Your Next Deep-Work Session”

Selected headline: Output 2.

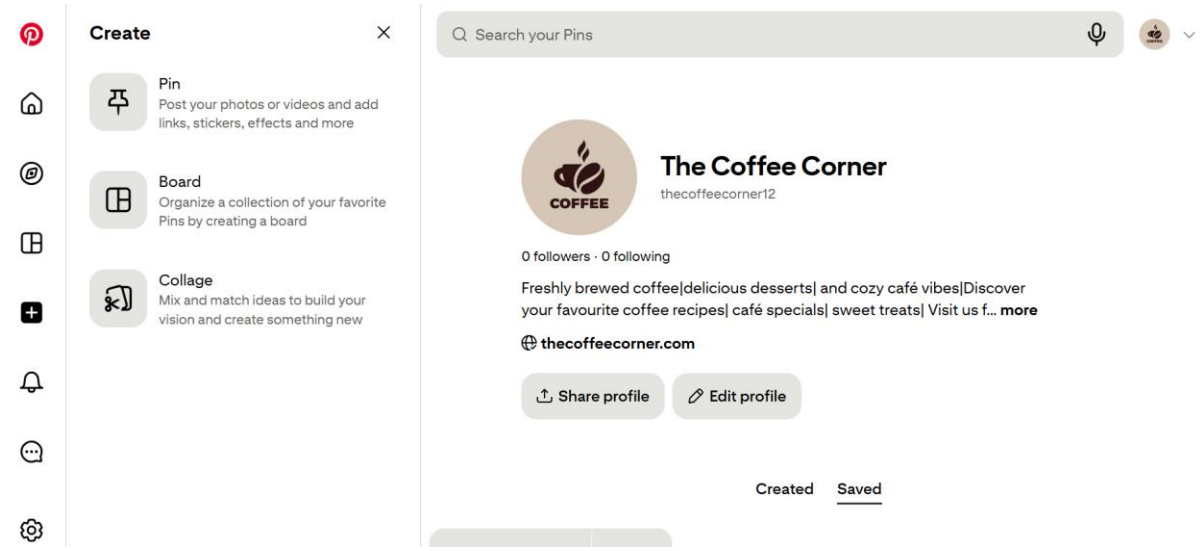

Reason: It creates curiosity through a question, connects music to a specific need, and offers a clear next step without promising guaranteed results.

Conclusion: These headlines demonstrate how different hooks can promote the same playlist. The best-performing option should ultimately be determined by actual click-through data, not assumptions alone.

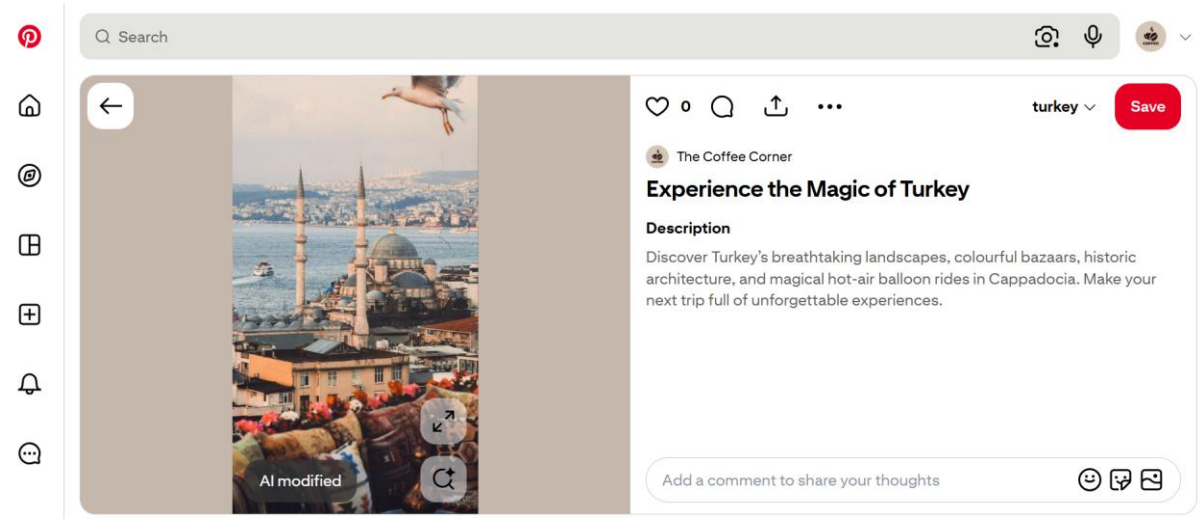

SESSION 15

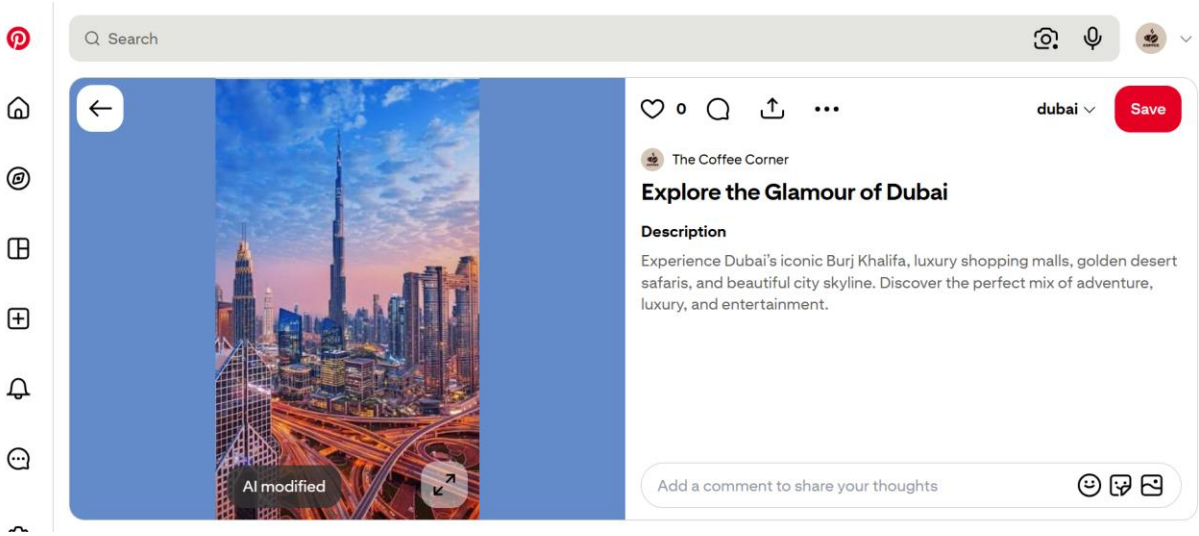

PINTREST MARKETING – STRATEGY, CONTENT & ADS

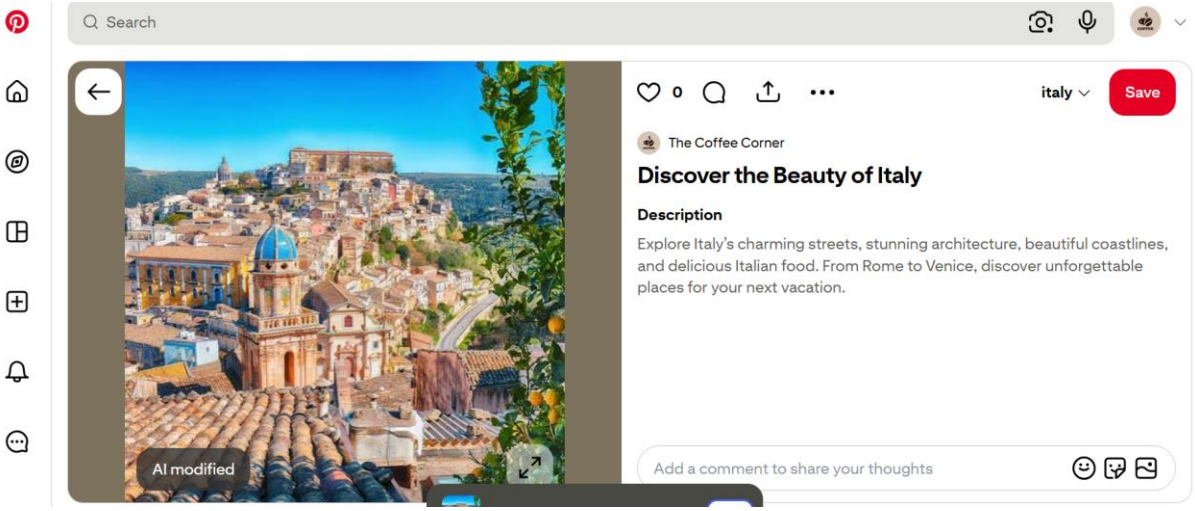

Task : 1

Task : 2

Task : 3

One-Week Pinterest Content Calendar for a Fashion Brand

Brand: StyleAura Fashion

Day	Pin topic	Pin type	Target keywords
Monday	Latest outfit trends	Standard Pin	latest fashion trends, trendy outfits
Tuesday	Everyday styling tips	Idea Pin	everyday outfit ideas, styling tips

Wednesday	Summer dress collection	Standard Pin	summer dresses, women's fashion
Thursday	3 ways to style jeans	Video Pin	jeans styling ideas, casual outfits
Friday	Office wear inspiration	Standard Pin	office wear for women, formal outfits
Saturday	Weekend outfit ideas	Idea Pin	weekend outfits, casual fashion
Sunday	Accessories and outfit combinations	Video Pin	fashion accessories, outfit inspiration

Goal: Increase brand awareness, saves, engagement, and clicks to the fashion website.

Task : 4

Pinterest Analytics — 3 Insights

Sample data for an assignment; these are illustrative figures, not actual Pinterest account analytics.

Content	Impressions	Saves	Outbound clicks
Summer outfit ideas	5,000	250	120
Office wear inspiration	3,500	180	90
Fashion accessories	2,000	150	35

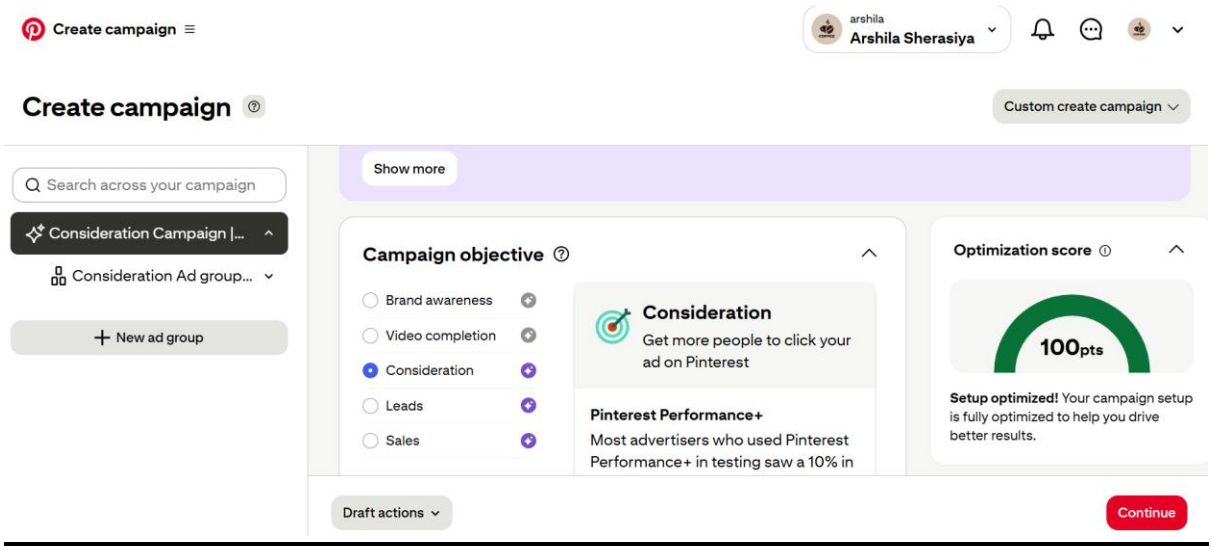

Insight 1: Summer outfit ideas performed best in impressions, with 5,000 impressions. Seasonal and visually attractive fashion content may attract more attention.

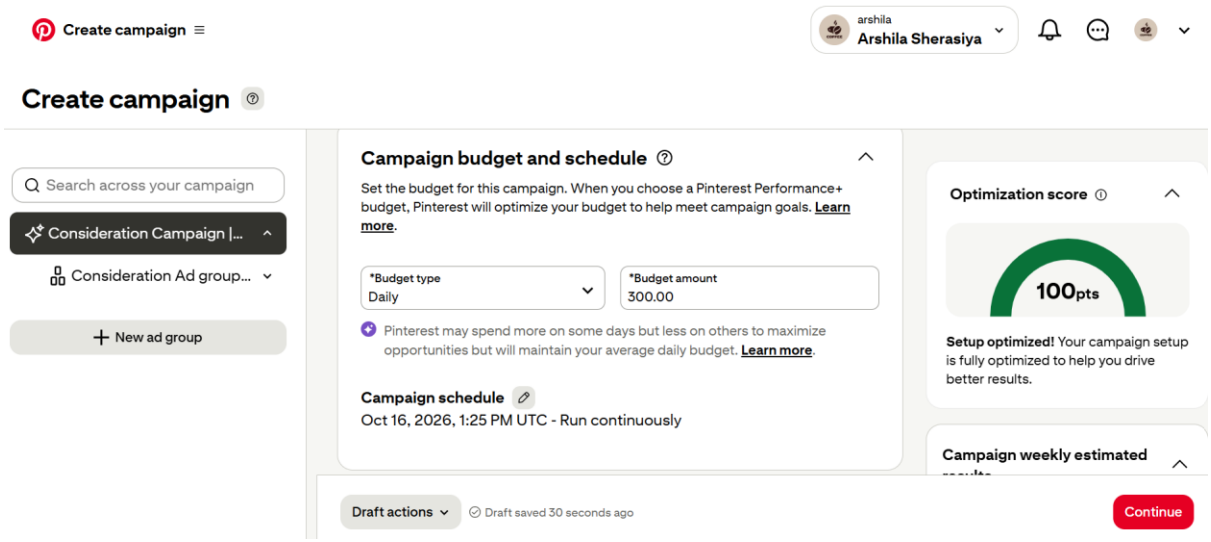

Insight 2: Summer outfit ideas also received the highest number of saves, at 250. This suggests that users found the content useful enough to revisit later.

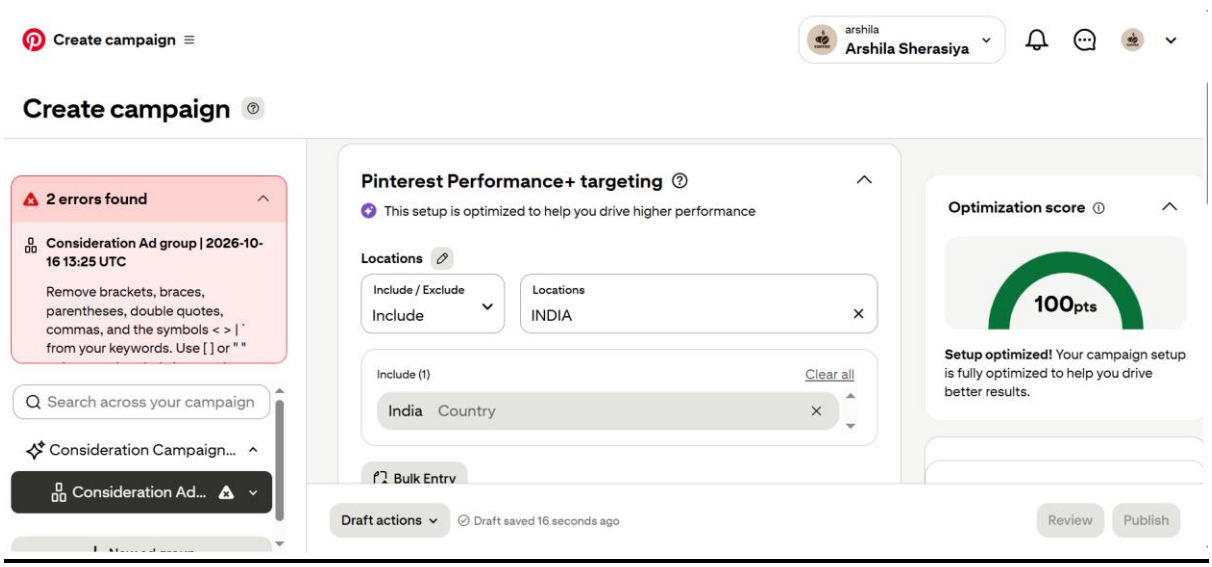

Insight 3: Fashion accessories received 150 saves despite only 2,000 impressions, but generated just 35 outbound clicks. Users may like saving accessory inspiration without being ready to visit the website. Clearer product links and stronger calls-to-action could help improve clicks.

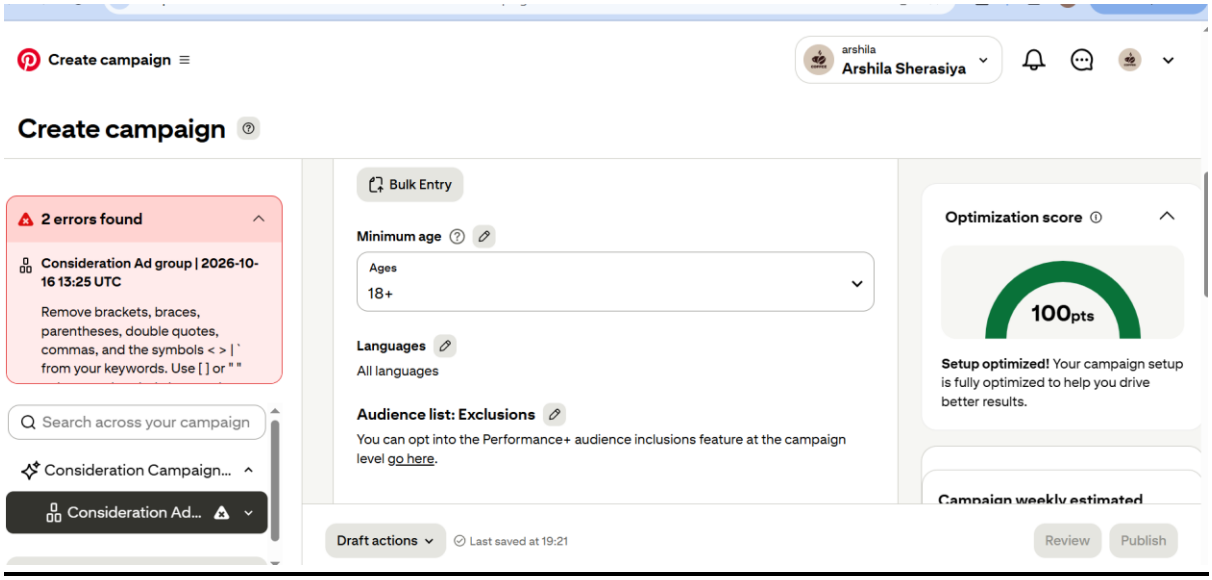

Conclusion: The brand should continue creating seasonal outfit content and test clearer links and CTAs to increase website traffic.

SESSION :16

SMO FOUNDATIONS – STRATEGY, SWOT & ORGANIC REACH

Task : 1

Best Performing Content Types on Two Social Media Platforms

Platform 1: Instagram

1. Reels: Short videos attract more viewers and help reach people who do not follow the account.
2. Carousels: Multiple images or slides share useful information and encourage saves and shares.
3. Stories: Polls, questions, and daily updates increase interaction with followers.

Platform 2: X (Twitter)

1. Text Posts: Short, engaging opinions and updates encourage replies and discussions.
2. Threads: Detailed information shared across multiple tweets keeps readers interested.
3. Images and Videos: Visual content attracts attention and makes posts more engaging.

Task : 2

SWOT Analysis for a New Instagram Food Review Page

SWOT	Analysis
Strength	Attractive food photos and honest reviews can build audience trust.
Weakness	A new page has low followers and limited reach initially.
Opportunity	Collaborations with local restaurants can increase visibility.
Threat	Competition from established food bloggers can make growth difficult.

Task :3

Organic Content Strategy for a Flipkart-Style Facebook Deals Page

1. Post daily deals, discounts, and product comparisons to attract budget-conscious shoppers.
2. Share Stories featuring limited-time offers and polls to encourage interaction.
3. Create short videos and Reels demonstrating useful products and highlighting their benefits.
4. Post shopping tips and product recommendations to provide value and encourage shares.
5. Use relevant hashtags and reply to comments regularly to build engagement and organic reach

---

Task : 4

Instagram Bio and CTA for a Music Playlist Page

Page Name: BeatVibes Playlist

Instagram Bio:

🎧 Your daily dose of music
🎶 Trending hits • Chill vibes • Party playlists
✨ Discover your next favourite song
📩 DM “PLAYLIST” to get your perfect mix!

Call-to-Action (CTA): “DM us PLAYLIST to get your music recommendations!”

Task : 5

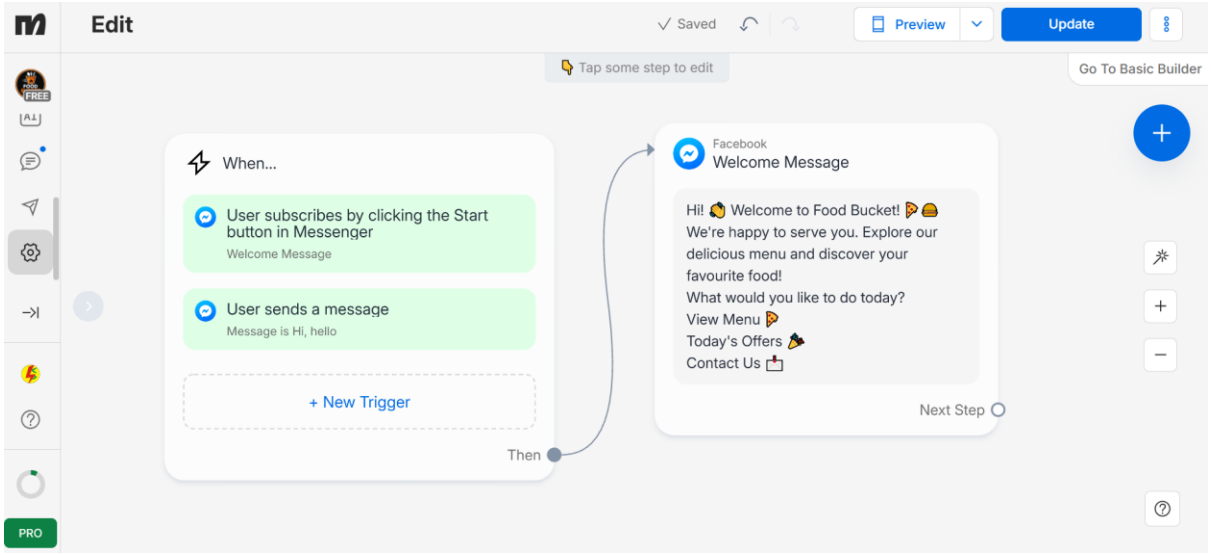

Redesign a Facebook Page for a Local Cricket Fan Club

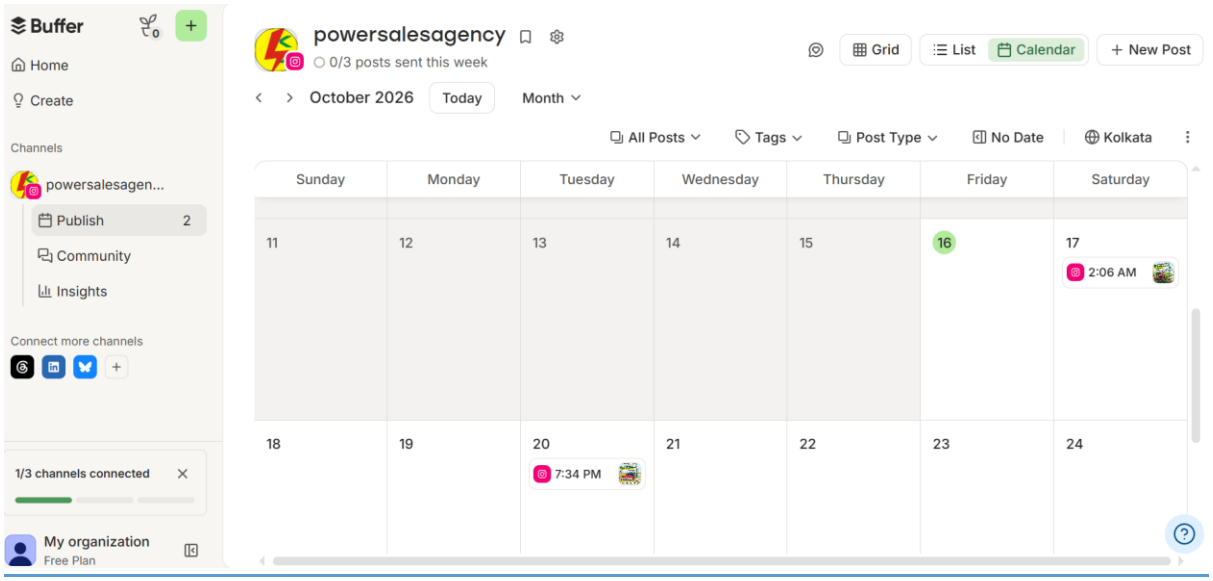

SESSION 17

SMO TOOLS – CHATBOTS, SCEDULING & CONTENT CALENDAR

Task: 1

Task : 2

Task : 3

One-Week Social Media Content Calendar

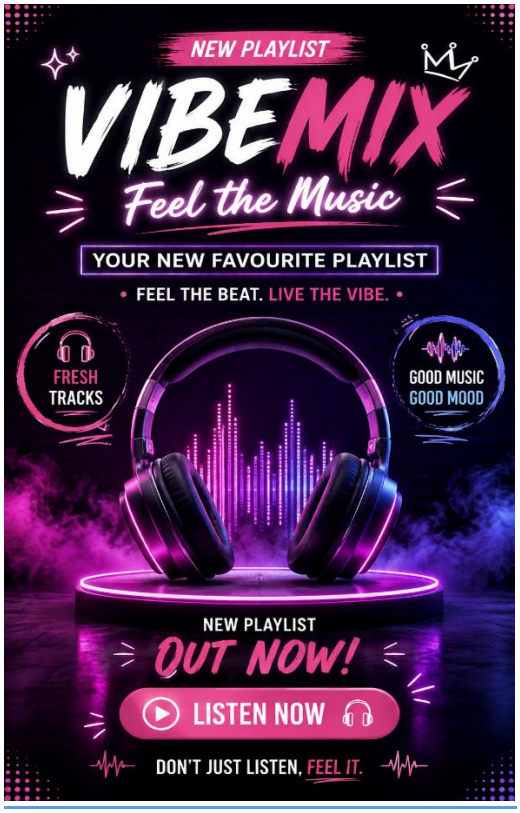

Fictional business: Food Bucket — Food Delivery App

Day	Platform	Content type and topic	Suggested time
Monday	Instagram	Food photography — Special Pizza	7:00 PM
Tuesday	Facebook	Offer post — 20% OFF on first order	1:00 PM
Wednesday	X (Twitter)	Food-related funny meme	6:00 PM
Thursday	Instagram	Story — Poll: Pizza or Burger?	5:00 PM
Friday	Facebook	Customer review and testimonial	7:00 PM
Saturday	Instagram	Reel showing delicious food options	8:00 PM
Sunday	X (Twitter)	Weekend food offer announcement	12:00 PM

Task : 4

Promotional Instagram Story for a New Playlist

Playlist name: VibeMix — Feel the Music

Task: 5

Five Creative Social Media Post Ideas

Business: Arbin Clothing Store

No.	Post idea	How to visualize in Canva or CapCut
1	New Arrivals	Create a clean fashion collage featuring new shirts and trousers.
2	Outfit of the Day	Make a Reel showing a complete casual outfit with trending music.
3	Festive Fashion Offer	Design a colourful promotional poster with discount details.
4	Style Tips	Create a carousel showing three ways to style one shirt.
5	Customer Favourite	Design a customer-review post featuring a product photo and a short testimonial.

SESSION :18

SMO ADVANCED – ALGORITHAMS,CONSISTANCY & INFLUENCER MARKETING

TASK : 1

Comparison of Instagram and YouTube Algorithms

Instagram	YouTube
Instagram ranks content based on users' interests and interactions.	YouTube recommends videos based on viewers' interests and viewing behavior.
Factor 1: Likes, comments, shares, and saves.	Factor 1: Watch time and audience retention.
Factor 2: Relationship with the creator and past interactions.	Factor 2: Click-through rate, watch history, and viewer satisfaction.

Conclusion: Both platforms personalize content to keep users interested. Instagram focuses heavily on social interactions, while YouTube places significant importance on viewing behavior and satisfaction.

TASK : 2

One-Week Instagram Content Calendar

Brand: FoodieGo — A New Food Delivery App

Day	Time (IST)	Content
Monday	12:00 PM	App launch announcement with a food-themed creative.
Tuesday	7:00 PM	Reel showing delicious pizza and burger options.
Wednesday	1:00 PM	Carousel featuring the top 5 popular dishes.
Thursday	7:00 PM	Story poll: "Pizza or Biryani?"
Friday	6:30 PM	Weekend offer post with a discount code.
Saturday	12:30 PM	Reel showing quick and convenient food ordering.
Sunday	7:00 PM	Customer-review creative and a call to download the app.

Consistency and cadence: FoodieGo will publish one post, Reel, or Story daily for seven days. Posting around lunchtime and evening targets common meal-planning periods. A consistent schedule helps build audience expectations, while engagement data can be used to improve future posting times.

TASK: 3

10 Content Ideas for a Music Playlist Sharing Feature

Tool used: ChatGPT

Prompts used:

1. Generate 10 fresh content ideas for a new music playlist-sharing feature in a Spotify-style app.
2. Suggest Instagram Reel ideas to promote music playlist sharing among young users.
3. Create interactive social media campaigns encouraging users to share their favorite songs.
4. Suggest viral challenges for a music streaming app.
5. Generate user-generated content ideas for playlist discovery.

10 generated content ideas:

1. Mood-Based Playlists — share playlists according to your mood.
2. Playlist Battle — friends compete to create the best playlist.
3. Song of the Day — share one favorite song daily.
4. Friendship Playlist — create a playlist with friends.
5. Guess the Song — identify songs from short clips.
6. Throwback Thursday — share nostalgic songs.
7. Workout Beats — share energetic workout playlists.
8. Music Personality Quiz — discover your music personality.
9. Trending Audio Challenge — create Reels using trending songs.
10. Collaborative Playlists — invite friends to add songs.

Top 5 most relevant ideas:

- Mood-Based Playlists
- Playlist Battle
- Friendship Playlist
- Guess the Song
- Collaborative Playlists

These ideas encourage participation, sharing, and repeat engagement among music lovers.

TASK : 4

Micro-Influencer Campaign for a Sneaker Drop

Selected influencer: Achint Chawla (@achint_chawla). His publicly listed profile had approximately 18.2K followers and sneaker-focused content, making him a relevant candidate for a sneaker launch.

Instagram profile: @achint_chawla

Influencer brief (maximum 5 lines):

- Campaign: Launch a limited-edition sneaker collection on a Myntra-style app.
- Target audience: Young adults interested in sneakers, fashion, and streetwear.
- Content: One unboxing Reel showing the design, comfort, and styling options.
- CTA: “Shop the new drop now through my exclusive link!”
- Hashtags: #SneakerDrop #SneakerStyle #NewLaunch

ROI tracking: Provide the influencer with a unique discount code, such as `KICKS10`, and track orders, revenue, and campaign expenses attributed to that code.

$$\text{ROI} = \frac{\text{Revenue} - \text{Campaign cost}}{\text{Campaign Cost}} * 100$$

For a more accurate profit-based ROI, use gross profit instead of revenue.

TASK : 5

Weekly SMO Client Report

Client: Foodie Hub (Zomato-Style Restaurant Account)
Platform: Instagram & Facebook
Reporting Period: 5–11 October 2026

1. Weekly Performance Overview

Metric	Weekly Performance
Total Followers	5,250
New Followers	+250 (+5%)
Engagement Rate	6.2%
Total Reach	18,500
Total Likes	2,450
Comments	185
Shares	320
Posts Published	5

2. Top-Performing Post

Post: Instagram Reel – "Cheesy Pizza Pull Challenge" 🍕

- Views: 12,400
- Likes: 1,150
- Comments: 95
- Shares: 180

Insight: Short food videos featuring close-up visuals received higher engagement than regular promotional posts.

3. Key Highlights

- Followers increased by 5% this week.
- Instagram Reels generated the highest engagement.
- Audience interaction improved through food-related content and engaging captions.

4. Recommendation for Next Week

Post 3 short Instagram Reels featuring trending food items, with engaging captions and a clear CTA such as "Tag your foodie friend!"

Goal: Increase engagement rate from 6.2% to 7% and gain 300 new followers next week.

Overall Summary: The account showed positive growth in followers and engagement. Continuing with engaging food Reels can help improve brand visibility and attract more potential customers.

Note: All figures are fictional and provided for assignment purposes.

SESSION 19

AI- POWERED CONTENT – CHATGPT ,VEO 3 & n8n AUTOMQATION

TASK : 1

Instagram Captions for a New Café Menu Launch

Café Name: The Coffee Corner New Menu Item: Chocolate Lava Cake

1. Something sweet is coming your way! 🍫 Try our new Chocolate Lava Cake and fall in love with every bite. ❤ #Foodie #DessertLovers

2. Warning: This Chocolate Lava Cake is seriously addictive! □ Come taste our newest dessert today. #Foodstagram #SweetTooth

3. Your dessert cravings just found their match! 😍 Our new Chocolate Lava Cake is waiting for you. #FoodiesOfInstagram #ChocolateLovers

4. One bite, endless happiness! 🍰 Celebrate our new menu launch with a delicious chocolate surprise. #InstaFood #FoodieLife

5. Chocolate lovers, this one's for you! 🔥 Enjoy our freshly launched Chocolate Lava Cake for a limited time. Visit us today! #FoodReels #DessertTime

---

TASK: 2

One-Week Instagram Content Calendar for a Fashion Brand

Brand Name: ARBIN Clothes

Day	Post Type	Suggested Caption	Hashtags
Monday	Image	Start your week with a fresh, stylish look! 👕	#MondayStyle #Fashion
Tuesday	Reel	3 ways to style your favourite shirt! ✨	#FashionReels #OOTD
Wednesday	Story	Which look do you prefer? Casual or Formal? Vote now!	#StylePoll #FashionLovers
Thursday	Image	Comfort meets style with our latest collection. □	#NewCollection #StyleInspo
Friday	Reel	Your perfect Friday outfit starts here! 🔥	#FridayFashion #OutfitIdeas
Saturday	Story	Guess the price of your favourite outfit! 🛍️	#FashionDeals #ShopNow
Sunday	Image	End your week with effortless everyday fashion.	#SundayStyle #CasualWear

Objective: To increase brand awareness, engage followers through interactive Stories, showcase clothing through Reels, and attract potential customers.

TASK: 3

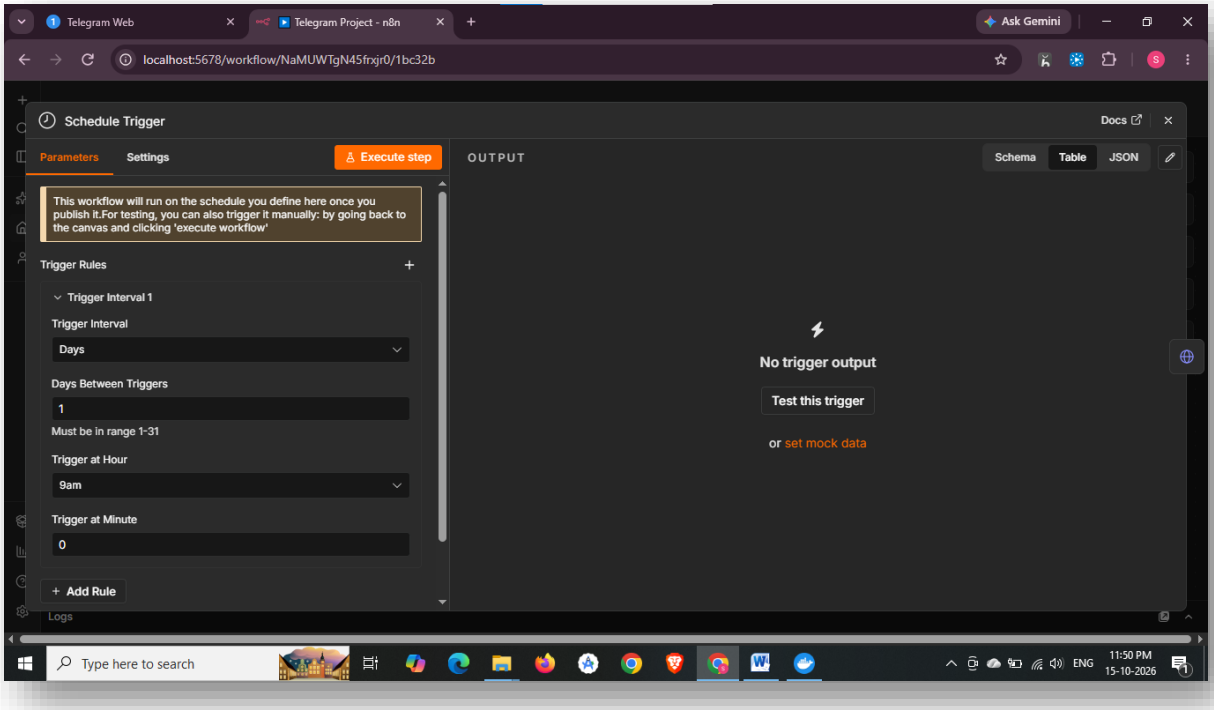

Google Veo 3 — 15-Second Zomato Restaurant Video Ad

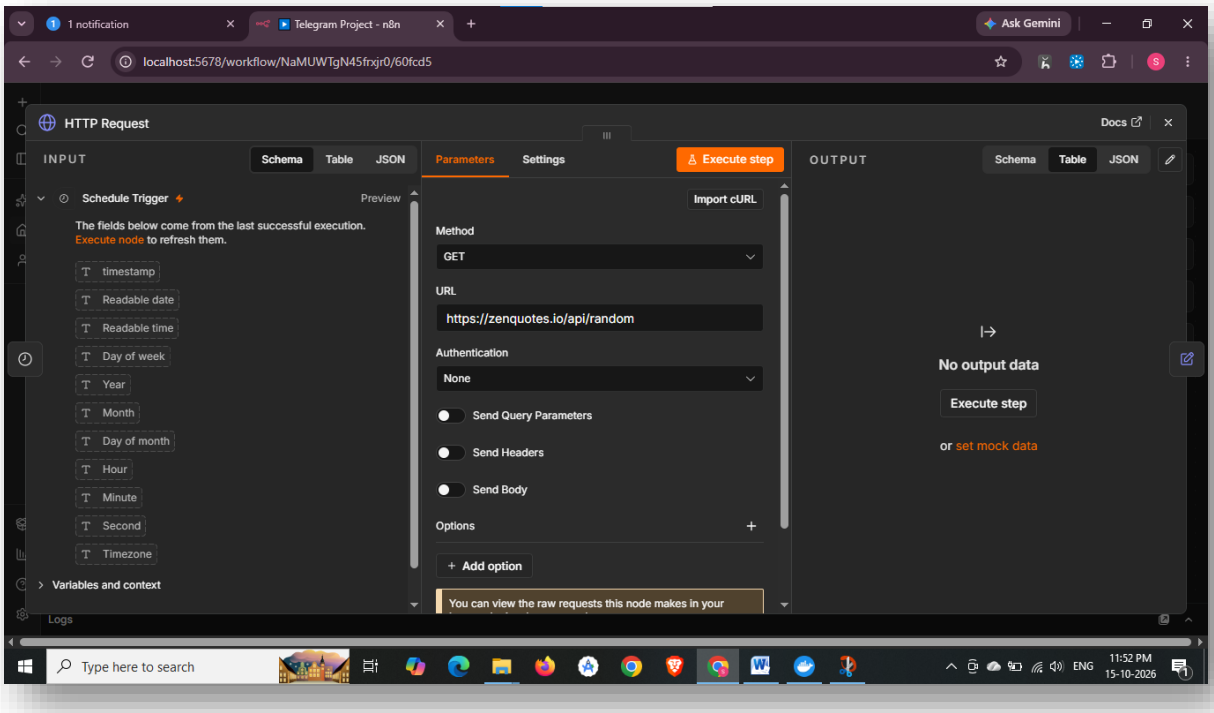

Restaurant Partner: Spice Hub Kitchen Offer: 20% OFF on your first order

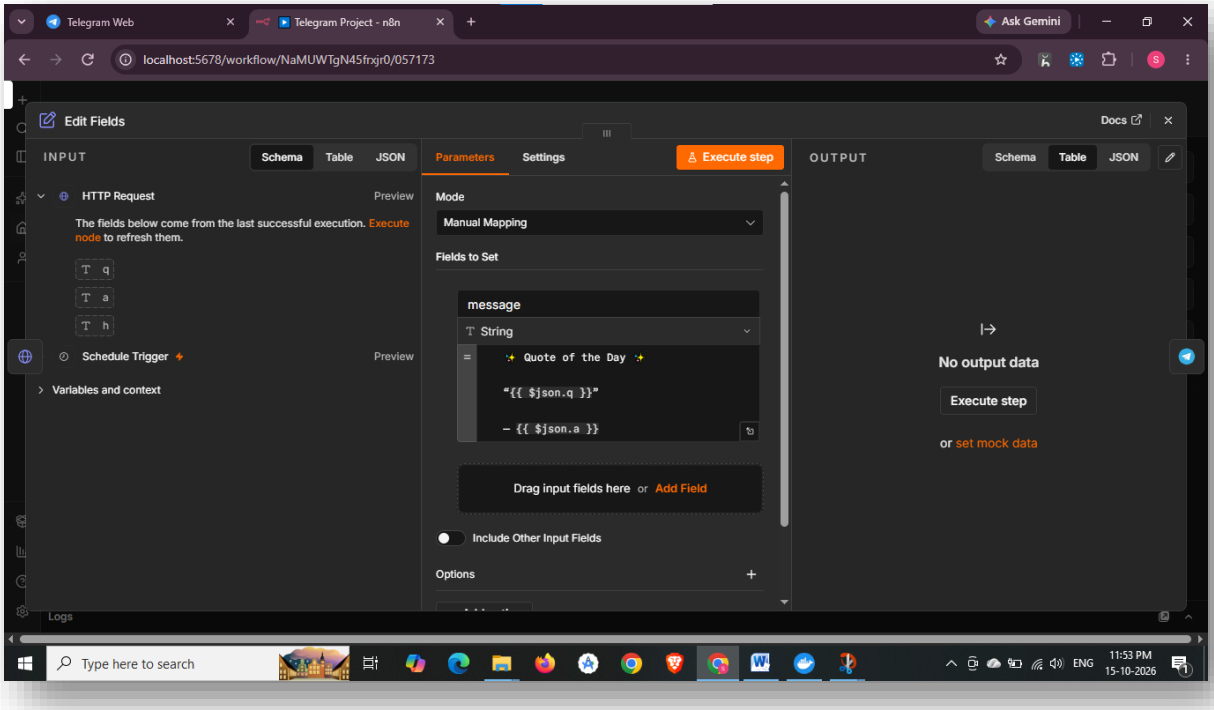

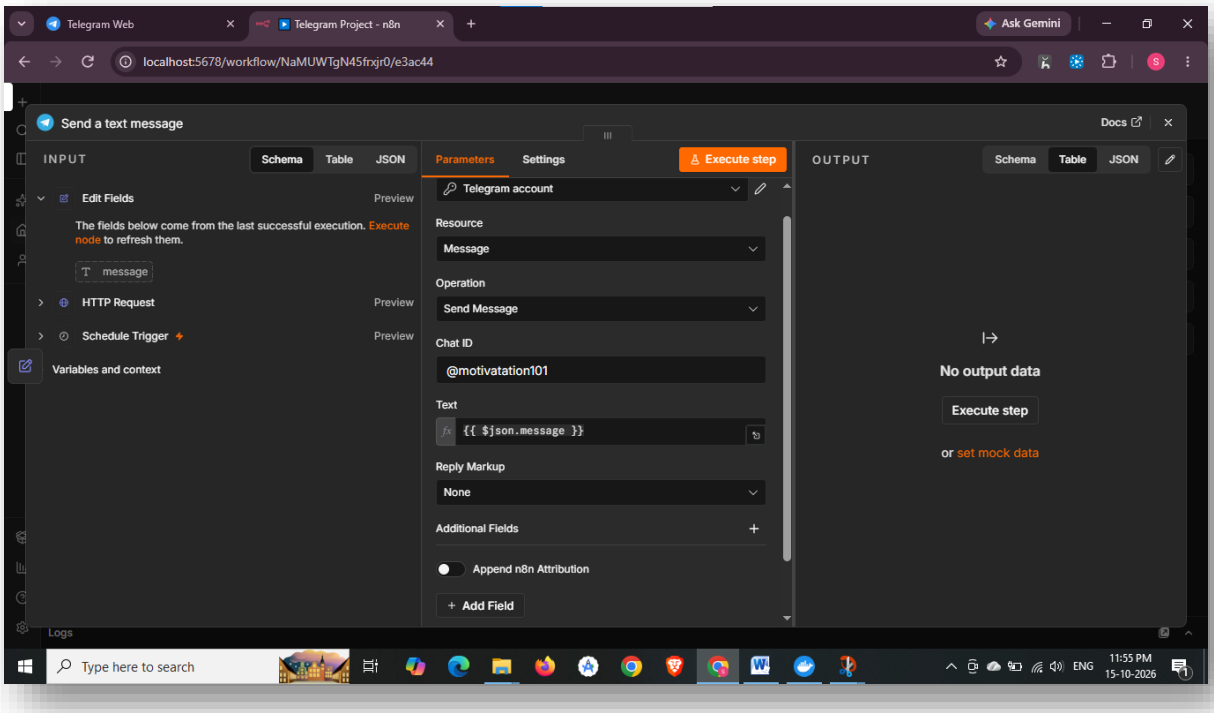

gemini_generated_video_b3dbd255.mp4

TASK: 5

10 Hook Ideas for a Payments App Video Ad

App: PayEasy — a fictional digital payments app similar to PhonePe. New feature: Split bills instantly with friends.

No.	Video hook idea
1	“Still calculating who owes whom? Stop doing maths after every outing!”
2	“Dinner is over, but the bill-sharing drama has just started?”
3	“Your friend said ‘I'll pay you later’… again?”
4	“Split a group bill in seconds, without the awkward reminders!”
5	“Five friends, one bill, zero confusion. Here's how!”
6	“Stop sending screenshots to remind friends about money!”
7	“Going out with friends? Let your phone handle the bill.”
8	“The easiest way to settle your group expenses starts here.”
9	“POV: Everyone pays their share before leaving the restaurant.”
10	“Your next group outing needs less money drama and more fun!”

Best hook selected

Selected hook

“Dinner is over, but the bill-sharing drama has just started?”

Suggested format: 15-second Instagram Reel

Why this hook works:

- Relatable: Many people have experienced awkward bill-splitting after eating out with friends.
- Creates curiosity: Viewers want to know how the app can solve the problem.
- Shows a clear problem: The opening immediately establishes the inconvenience.
- Demonstrates the solution: The video can show PayEasy splitting a bill into individual shares.
- Encourages action: End with “Split your next bill in seconds. Try PayEasy today!”

Suggested 15-second execution:

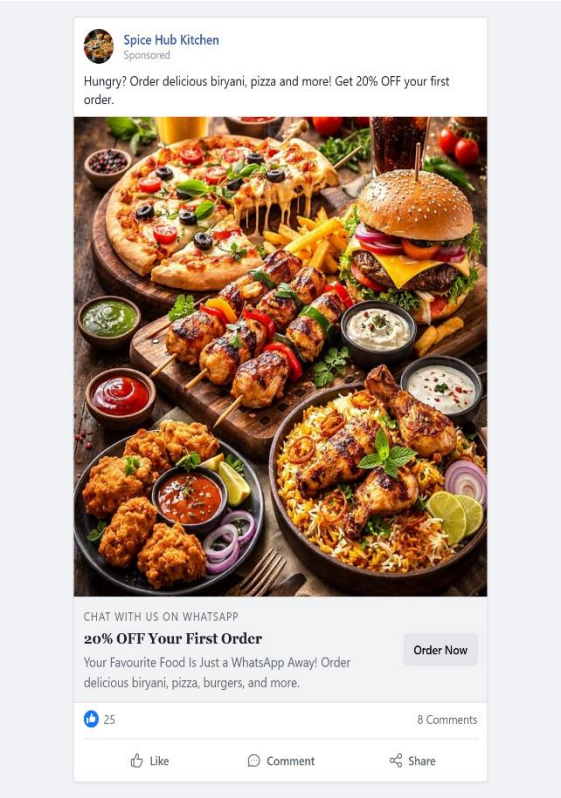

- 0–3 seconds: Friends finish dinner and argue jokingly over who owes what.
- 3–8 seconds: One friend opens PayEasy and splits the bill.
- 8–12 seconds: Each friend sees their share on the screen.
- 12–15 seconds: Show the app logo and CTA: “Less money drama. More memories. Try PayEasy!”

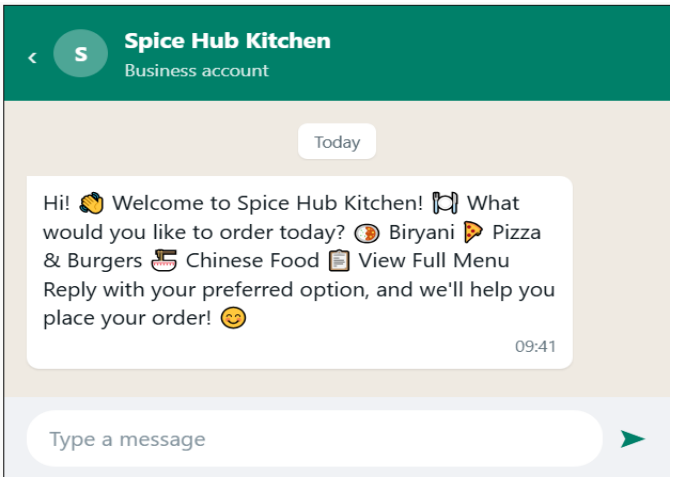

SESSION 20

WHATSAPP ADS, META AI & THE FUTURE OF SMM

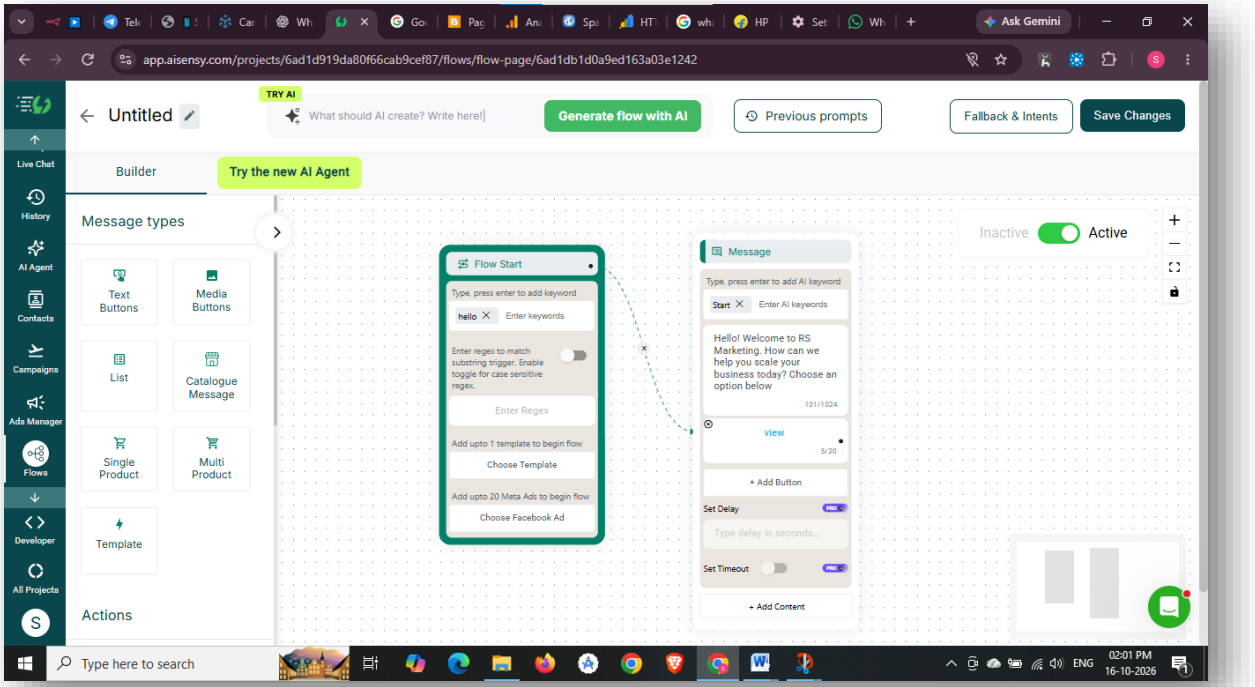

TASK: 1

Create a Mock Click-to-WhatsApp Ad

TASK: 2

TASK:3

Meta AI Business Assistant (MABA)

Meta's AI business tools can help businesses handle repetitive customer queries, recommend products, and support sales conversations. Availability depends on the feature and business eligibility.

Use case	How it helps	Example
1. Automated customer support	Answers common questions about business hours, location, and delivery.	A customer asks, “Are you open today?” and the AI replies with the restaurant's timings.
2. Product recommendations	Suggests products based on customer needs and available catalog information.	A customer asks for a budget-friendly phone, and the AI recommends suitable options.

3. Lead generation and sales	Collects customer requirements and helps move the conversation toward a purchase.	A customer asks about catering, and the AI collects the event date and number of guests.

TASK: 4

Two Major Changes Associated with Meta Andromeda

Important correction: Andromeda is Meta's AI-powered ad retrieval system for Facebook and Instagram advertising, not an update specifically to WhatsApp Business tools. The following are two major changes relevant to digital marketing.

1. Improved AI-powered ad personalization

Andromeda uses advanced machine learning to select more relevant ads for users from a large pool of potential advertisements.

Impact on marketing: Brands should create campaigns with clear audience objectives and monitor which creatives attract the right customers, rather than relying only on manual targeting.

2. Better handling of diverse ad creatives

The system is designed to handle a much larger volume of ad variations, supporting AI-assisted creative production and personalization.

Impact on marketing: Brands should test genuinely different images, videos, hooks, and messages instead of repeatedly using nearly identical ads. They can then evaluate results and improve campaign performance.

TASK: 5

AI and Automation Plan for a Social Media Agency in 2026

1. I would use AI tools like ChatGPT to create captions, content calendars, ad copy, and campaign ideas for multiple clients.
2. I would schedule Instagram posts, Reels, and Facebook posts using a social media management tool.
3. I would automate WhatsApp greetings, FAQs, product-category selection, and lead collection using a chatbot platform.
4. I would use Meta Ads Manager to create and manage Facebook and Instagram advertising campaigns.
5. I would use AI-assisted audience insights and campaign data to identify effective creatives and improve targeting.
6. I would track reach, engagement, leads, conversions, and advertising costs through regular reports.
7. I would review AI-generated responses, protect customer data, and personally handle complex customer complaints.

SESSION 21

CAPSTONE : FULL CAMPAIGN STRATAGEY & PRESENTATION

TASK:1

Campaign Objective & Target Audience

App: Zomato

Campaign Name: “Cravings? Sorted.”

Objective: Increase Zomato app downloads and encourage new users to explore restaurants and place their first food order.

Target Audience: People aged 18–30 in Ahmedabad, including college students and young professionals who enjoy ordering food online. The campaign will target food lovers interested in convenience, restaurant discovery, and different cuisines.

TASK: 2

7-Day Content Calendar

Day	Platform	Post Type	Time (IST)	Content Description
Monday	Instagram	Reel	7:30 PM	Show delicious food options with the message “Cravings? Sorted.”
Tuesday	Instagram Stories	Poll	1:00 PM	Ask users to choose between biryani and pizza.
Wednesday	Facebook	Carousel	12:30 PM	Explain how users can discover restaurants and order food.
Thursday	Instagram	Stories	8:00 PM	Highlight different cuisines and nearby restaurants.

Friday	X (Twitter)	Text + Image	6:30 PM	Ask followers about their favourite Friday food.
Saturday	Instagram	Reel	8:30 PM	Show friends deciding what to eat and exploring Zomato.
Sunday	Facebook + Instagram	Story	7:00 PM	Encourage users to discover food options for the coming week.

TASK: 3

Sample Social Media Posts

A. Instagram Post

🍕 Cravings hitting hard? Let Zomato sort your next meal! ❤️🍔

From delicious biryani to cheesy pizza, discover food that makes every meal special. Open the app, explore your favourites, and order your next delicious bite! 😋

📲 Download Zomato and satisfy your cravings.

#Zomato #Foodies #FoodLovers #AhmedabadFoodies #FoodDelivery #FoodCravings

B. X (Twitter) Post

Hungry but can't decide what to eat? 🍕🍜

From pizza to biryani, your next favourite meal is just a few taps away! Discover food options on Zomato and make every craving count. ❤️

#Zomato #Foodies #FoodDelivery

TASK: 4

Three Key Success Metrics

Metric	How it measures success
App Installs	Measures how many users download the app through the campaign.
Click-Through Rate (CTR)	Shows how effectively the ads encourage users to click and learn more.
Cost Per Install (CPI)	Measures the advertising cost for each attributed app install and helps evaluate campaign efficiency.

TASK: 5

Three-slide presentation and PDF

I've prepared both a three-slide PowerPoint presentation and its PDF version, covering the objective and audience, seven-day content plan, sample posts, and success metrics.

Campaign-Objective-and-Target-Audience.

Campaign-Objective-and-Target-Audience.
