Section A – Basics (Short Answers)

Task : 1

SEO (Search Engine Optimization) is the process of improving a website to increase its visibility in organic (unpaid) search engine results.

- On-Page SEO: Optimizing elements within a website, such as titles, meta descriptions, headings, content, images, and internal links.
- Off-Page SEO: Activities outside a website that improve its reputation and authority, such as earning backlinks, brand mentions, and guest posting.

Task : 2

Keywords are words or phrases that users type into search engines to find information, products, or services.

- Short-tail keywords: Short and broad search terms, usually consisting of one or two words. Example: “Shoes.”
- Long-tail keywords: Longer and more specific search phrases. Example: “Best running shoes for women under ₹2,000.”

Long-tail keywords generally have lower search volume but can attract more relevant visitors.

Task : 3

- Crawling: Search engines discover web pages using automated bots called crawlers.
- Indexing: Search engines analyze and store eligible web pages in their index.
- Ranking: Search engines order relevant results based on various factors to answer a user's search query.

Task : 4

SERP (Search Engine Results Page) is the page displayed by a search engine after a user enters a search query.

Three SERP features are:

1. Featured Snippets: Highlighted answers displayed near the top of search results.
2. People Also Ask: A section containing related questions and their answers.
3. Image Pack: A group of images displayed in search results.

Task : 5

Domain Authority (DA) is a third-party SEO metric developed by Moz that predicts how likely a website is to rank in search engine results compared with other websites. It is scored from 1 to 100.

A higher DA generally indicates a stronger backlink profile, but Domain Authority is not a Google ranking factor.

Section B – Practical Tasks

Task 1

Keyword Research – Bakery Business

Selected Business: Bakery Shop

Target Location: India

Objective: Bakery products se related relevant keywords identify karna, jisse website ki Google search ranking aur organic traffic improve ho sake.

- Primary Keywords: Short, broad keywords jo main products ya services ko target karte hain.
- Long-Tail Keywords: Specific phrases jo customer ki exact need ya search intent ko target karte hain.
- Search Volume: Ek keyword ko average kitni baar search kiya jata hai, usually per month.
- Keyword Difficulty (KD): Search results mein rank karne ki estimated difficulty, usually 0–100 scale par.

1. Primary Keywords – 10 Keywords

No.	Primary Keyword	Monthly Search Volume (Estimated)	Keyword Difficulty (Estimated)
1	Bakery	10,000–50,000	High
2	Cake shop	10,000–50,000	High
3	Bakery near me	10,000–50,000	High
4	Birthday cake	10,000–50,000	High
5	Custom cakes	1,000–10,000	Medium
6	Pastry shop	1,000–10,000	Medium
7	Chocolate cake	10,000–50,000	High
8	Cupcakes	1,000–10,000	Medium
9	Fresh bread	1,000–10,000	Medium
10	Wedding cakes	1,000–10,000	High

2. Long-Tail Keywords – 10 Keywords

No.	Long-Tail Keyword	Monthly Search Volume (Estimated)	Keyword Difficulty (Estimated)
1	Best bakery near me	1,000–10,000	Medium
2	Birthday cake shop near me	1,000–10,000	Medium
3	Best chocolate cake for birthday	100–1,000	Low
4	Custom photo cake for birthday	100–1,000	Low
5	Eggless cake shop near me	1,000–10,000	Medium
6	Online cake delivery near me	1,000–10,000	Medium
7	Fresh cream cake shop near me	100–1,000	Low
8	Best bakery for pastries near me	100–1,000	Low
9	Affordable wedding cake bakery	100–1,000	Low
10	Order fresh cupcakes online	100–1,000	Low

3. Tools Used for Keyword Research

- Ubersuggest: Provides estimated search volume and SEO difficulty for a selected location.
- Google Keyword Planner: Provides keyword ideas and average monthly search estimates.

Official tool links:

- Ubersuggest Keyword Research
- Google Keyword Planner

4. Conclusion

Primary keywords help a bakery target broad searches, while long-tail keywords target more specific customer needs. A bakery should prioritize relevant local keywords such as “eggless cake shop near me” and “custom photo cake for birthday” to attract potential customers.

For a genuine practical submission, enter these 20 keywords into Ubersuggest, select India as the location and English as the language, and replace the illustrative figures with the actual results. Ubersuggest explains how to retrieve these metrics in its keyword research guide.

Task : 3

Technical SEO Checklist

Website Name: AI in Everyday Life Blog
Website URL: https://ai-everyday-life-2026.blogspot.com/
Audit Date: 20 October 2026

1. Technical SEO Audit Results

Checklist Item	Result	Observation
Page Speed Score (Mobile)	61/100	Needs Improvement
Page Speed Score (Desktop)	83/100	Good, but can be improved
Mobile Friendliness	Needs Improvement	Mobile layout appears accessible, but usability should be checked separately
Broken Links	5 failed URLs	77 URLs scanned; 72 OK and 5 failed
Sitemap Present	Yes	Sitemap.xml is accessible and contains the blog post URL
Robots.txt	Present — Needs Review	File exists and includes sitemap references and crawling rules

2. Broken Links Identified

The broken-link checker reported these five URLs as 404 Not Found:

1. `https://lh3.googleusercontent.com/blogger_img_proxy/...` — Image URL reported as broken.
2. `https://ai-everyday-life-2026.blogspot.com/p/home-icon` — Home page link.
3. `https://ai-everyday-life-2026.blogspot.com/2026/06/home-icon` — Home page link.
4. `https://www.youtube.com/@yourchannel` — YouTube channel link.
5. `https://ai-everyday-life-2026.blogspot.com/home-icon` — Home page link.

3. Sitemap Analysis

The sitemap is accessible at:

`https://ai-everyday-life-2026.blogspot.com/sitemap.xml`

It contains a blog post URL for the article “Artificial Intelligence in Everyday Life.” Therefore, the sitemap is present.

4. Robots.txt Analysis

The robots.txt file is accessible at:

`https://ai-everyday-life-2026.blogspot.com/robots.txt`

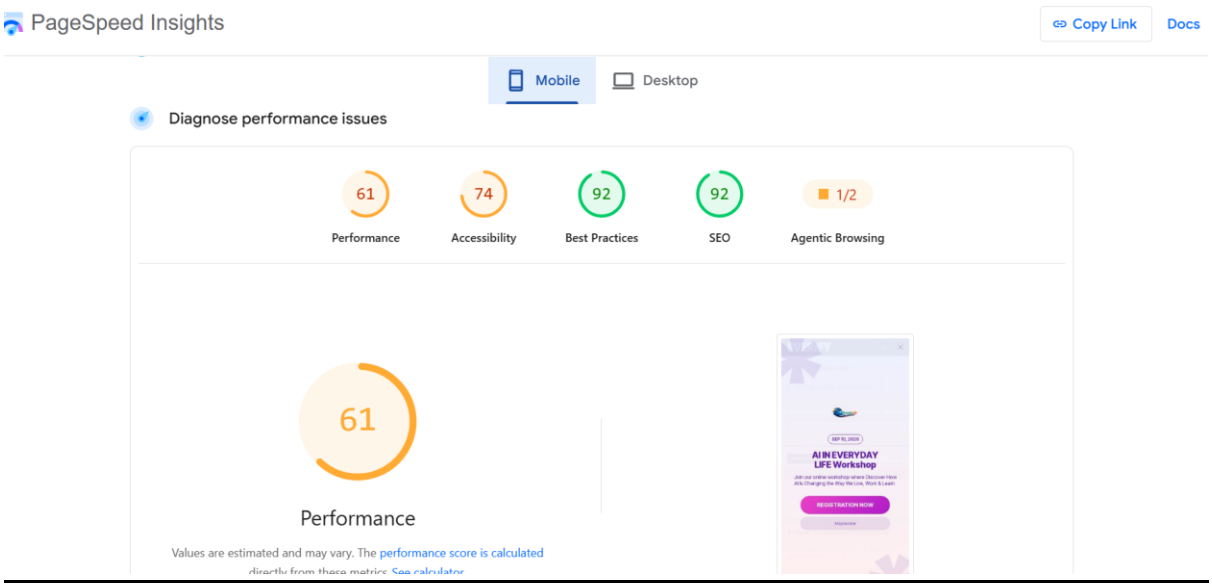

It contains user-agent directives, crawling rules and sitemap references. However, the duplicate rules and sitemap entries should be reviewed to ensure they are intentional and do not create unnecessary confusion.

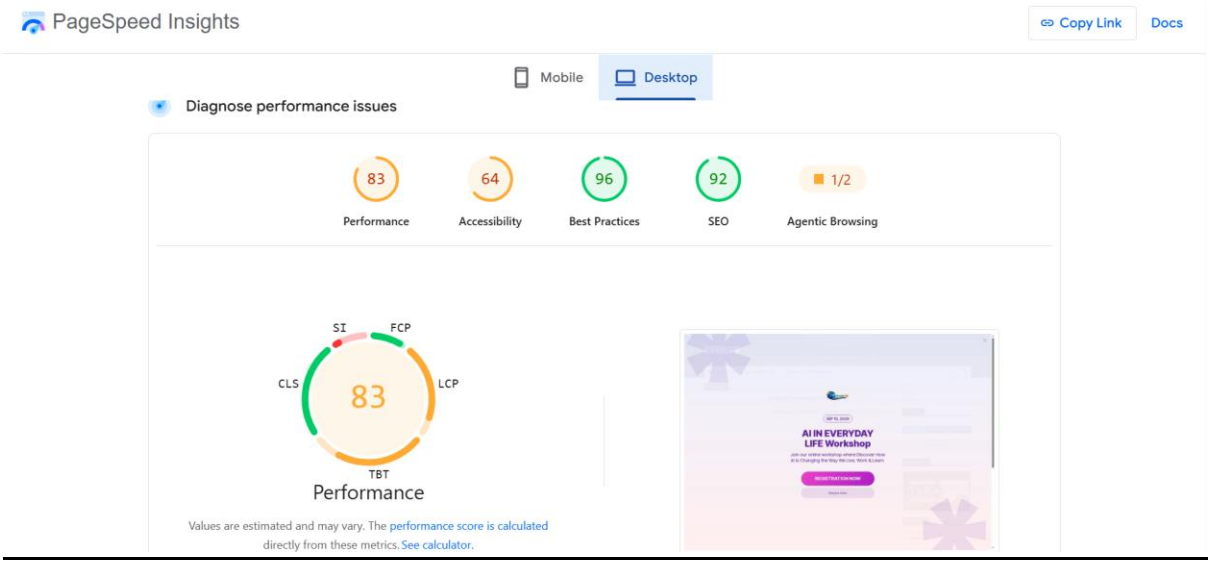

5. Recommendations

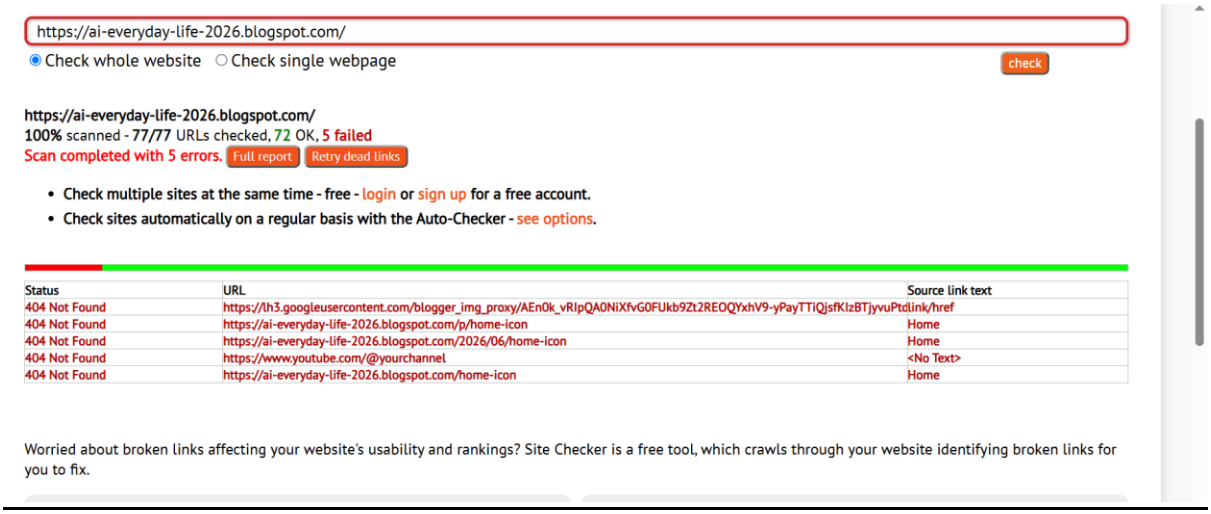

- **Improve mobile speed:** Optimize images, reduce unnecessary scripts and review loading performance.
- **Fix broken links:** Correct the Home links and replace the placeholder YouTube channel URL with the actual channel URL.
- **Check the image URL:** Replace or restore the image if it is genuinely unavailable.
- **Review mobile usability:** Check text size, navigation, buttons and horizontal scrolling on a real mobile device.
- **Review robots.txt:** Keep the necessary crawling rules and valid sitemap references.
- **Monitor performance:** Run PageSpeed Insights periodically to track improvements.

Conclusion

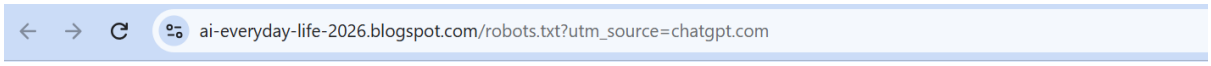

The website has a working sitemap and robots.txt file. The desktop performance score is 83/100, while mobile performance is 61/100, making mobile speed the main area for improvement. The broken-link checker identified five failed URLs that should be investigated and corrected. Fixing these issues can improve the website's usability and technical SEO health.

Section C – Mini Project

SEO Audit and Strategy for a Bakery Business

Digital Marketing Assignment · Local SEO · October 2026

1. Business Overview

- Business type: Bakery and Cake Shop
- Business name: Sweet Crumbs Bakery (sample business)
- Location: Rajkot, Gujarat, India
- Target audience: Local families, students, working professionals and people ordering cakes for birthdays and celebrations.
- Main products: Birthday cakes, customized cakes, pastries, cupcakes, cookies and fresh bread.
- SEO goal: Improve Google search visibility, attract local customers and increase calls, directions and cake orders.

2. SEO Audit — 12 Points

The following is a preliminary audit checklist for the sample bakery website. Since this is a fictional business, these are items to verify and improve, not confirmed website errors.

No.	SEO audit point	What to check or improve
1	Title tag	Include the main keyword and location, e.g. “Bakery in Rajkot | Sweet Crumbs”.
2	Meta description	Write a unique description mentioning cakes, bakery products and Rajkot.
3	Heading tags	Use one clear H1 and relevant H2 headings.
4	Keyword optimization	Include relevant bakery and cake-related keywords naturally.
5	Website speed	Test using Google PageSpeed Insights and improve loading time.
6	Mobile friendliness	Ensure the website works properly on mobile devices.
7	Image optimization	Compress images and add descriptive alt text.
8	URL structure	Use short, descriptive URLs such as /birthday-cakes-rajkot/.
9	Internal linking	Link the homepage to cake, pastry, product and contact pages.
10	Technical SEO	Check robots.txt, XML sitemap and Google Search Console indexing.
11	Local SEO	Create or optimize the Google Business Profile with accurate details.
12	Reviews and backlinks	Encourage genuine customer reviews and earn links from relevant local websites.

3. Keyword Strategy Table

The keywords below are proposed targets, not verified search-volume data. Actual monthly volume and keyword difficulty should be checked using Google Keyword Planner or Ubersuggest.

Keyword	Type	Search intent	Priority
bakery in Rajkot	Short-tail/local	Find a bakery	High
cake shop in Rajkot	Short-tail/local	Find a cake shop	High
bakery near me	Local	Find a nearby bakery	High
birthday cake Rajkot	Local/product	Buy a birthday cake	High
customized cakes Rajkot	Long-tail/local	Order a custom cake	High
eggless cake shop Rajkot	Long-tail/local	Find eggless cakes	High
chocolate cake price Rajkot	Long-tail	Compare prices	Medium
fresh pastries in Rajkot	Long-tail/local	Buy pastries	Medium
online cake delivery Rajkot	Long-tail/local	Order cake delivery	High
affordable birthday cakes in Rajkot	Long-tail/local	Find budget cakes	Medium

Keyword implementation plan:

- Homepage: bakery in Rajkot, cake shop in Rajkot.
- Birthday cake page: birthday cake Rajkot, affordable birthday cakes in Rajkot.
- Custom cake page: customized cakes Rajkot, eggless cake shop Rajkot.
- Delivery page: online cake delivery Rajkot.
- Blog articles: cake prices, cake selection tips and birthday cake ideas.

4. Competitor Analysis — 5 URLs and Their Strengths

These are real businesses or platforms competing for bakery and cake-related searches in Rajkot. The strengths listed are based on publicly visible listings and pages, not a complete technical audit of their websites.

1. Tortolious — Designer Cake Studio

Strengths: Specialized designer and customized cakes, strong local review profile and a clear niche in celebration cakes.

2. Ezzy Bakery

Strengths: Customized birthday and wedding cakes, a broad bakery range and a substantial base of customer reviews.

3. Aarika Cakes Villa

Strengths: Positive customer reviews, customized celebration cakes and eggless cake options.

4. Bake Da Cake

Strengths: Online menu, product variety including cheesecakes and brownies, and a platform for discovering and ordering products.

5. IGP — Online Cake Delivery

Strengths: Dedicated Rajkot delivery landing page, multiple cake categories, product listings and customer ratings.

Competitor takeaway: Sweet Crumbs Bakery should focus on local searches, specific cake categories, quality product photographs, genuine reviews and an easy ordering experience. Competing only on the broad keyword “bakery” would be less focused than targeting local and product-specific searches.

5. Final SEO Recommendations

1. Improve local SEO

Create and verify a Google Business Profile. Add the correct address, phone number, opening hours, products, photos and ordering details.

2. Optimize website content

Write unique title tags, meta descriptions, H1 headings and product descriptions for every important page.

3. Improve speed and mobile experience

Compress cake images, reduce unnecessary scripts and make phone, WhatsApp and order buttons easy to use.

4. Publish useful content

Create articles such as “How to Choose a Birthday Cake in Rajkot” and “Eggless vs. Regular Cakes: What to Know.”

5. Build trust and local authority

Request honest reviews from customers, respond professionally and seek relevant links from local event planners and community websites.

6. Track SEO performance

Set up Google Search Console and Google Analytics 4. Monitor impressions, clicks, keyword positions, calls, directions and orders.

Suggested 30-Day Action Plan

Timeline	Activity
Week 1	Set up Google Business Profile and check technical SEO.
Week 2	Optimize titles, headings, URLs and product pages.
Week 3	Publish two useful blog articles and improve product images.
Week 4	Collect genuine reviews, check Search Console and review results.

Conclusion

SEO can help Sweet Crumbs Bakery improve its visibility in local Google searches, reach customers searching for cakes in Rajkot and generate more inquiries and orders. The best approach is to combine local SEO, relevant keywords, useful website content, technical improvements and ongoing performance tracking.
